

# LANDSCAPING

The drainage range for domestic use  
and landscaping

**Version 2.7.1**

Our benefits with products from HAURATON:

**„Corrosion-free channel systems from HAURATON provide for satisfied customers.** Permanently resistant, effective installation and great design. Is there anything else you desire?“

### Customer benefits

How you profit from HAURATON.

4

### RECYFIX®PRO

Corrosion-free drainage channels for private and public areas.

10

### RECYFIX®PLUS

Drainage channels with sophisticated look for public and commercial areas.

50

### RECYFIX®STANDARD

Drainage channel for domestic applications around the house and garden.

88

### Facade Drainage

Reliable water retention system for terraces, facades and flat roofs.

118

### SLOTTED CHANNELS

Slotted channels for design-sensitive applications.

184

### RECYFIX®POINT FASERFIX®POINT

Point drainage for yards, garages and patios.

206

### RECYFIX®GREEN

Turf honeycomb for infiltration of rainwater in parking areas.

214

### LINEFIX®

Effective border edging for garden and park areas.

220

### TOP X

The drainage channel for private driveways, courtyards, patios and gardens.

226

### Technical information for applied materials

Resistance list for the materials RECYFIX® and FASERFIX®

238

„**Security in design and material** -  
that's all I expect from a good  
drainage channel.“

My benefit as an Architect with **HAURATON**:

**award-winning**

**durable**

**meets all standards**

*My benefit:*  
**Quality assured**

# Security during planning process

**HAURATON** offers architects as partners a maximum planning security. Products and processes are constantly monitored and are subject to stringent quality requirements.

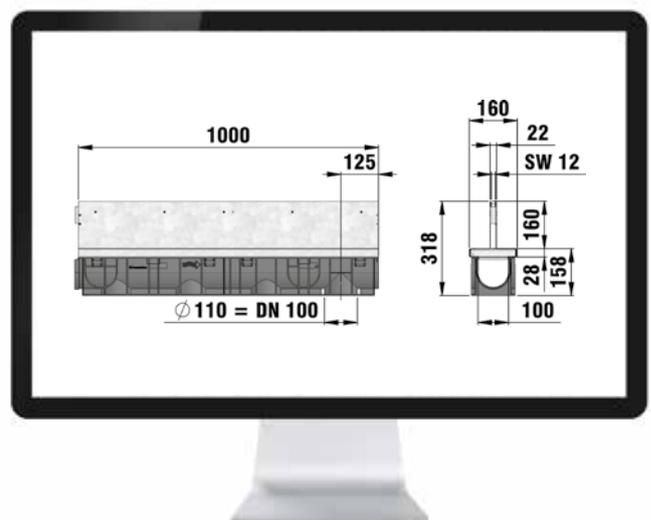

## Standards, approvals and warranties

- channels certified according to DIN EN 1433
- testing certificates from external institutes
- CE-Labels
- quality certification in accordance with DIN EN ISO 9001:2015

## Planning support

- DWG drawings for all products on the internet for total planning security
- Specification assistant with detailed search function to find the optimal products for various applications

„There are plenty of activities happening on site. With the unbreakable channel, I am able to save costs and hassle.

Moreover, due to its extremely light weight, the channel is highly back-friendly.”

My benefit as Landscape Gardener with Hauraton:

quick installation

absolutely stable

My benefit:  
**Cost savings**

## Lightweight for easy, quick and cost-efficient installation.

- highest stability with minimised weight
- much lighter than conventional channels made of mineral materials. In comparison: one polymer channel weighs as much as 2.5 m RECYFIX 100
- very easy to transport and install

1 m NS 100 Channel incl. grating = 4 kg  
1 m NS 200 Channel incl. grating = 8 kg

## RECYFIX® – stable and unbreakable:

- high-tech material developed by a well-known Research Institute for Recycling-Plastic
- durable resistance against frost, de-icing salt and UV radiation
- elastic and ultra-strong material
- stable already during installation, compacting of paved surfaces along the channel is possible - no breakage means that the construction schedule can be met
- withstands high traffic loads and temperature differences in daily use

„I can provide my customers a channel which is quickly and easily loaded into a car; and I profit from a higher stock turnover.“

My benefit as a Construction Material Dealer with HAURATON:

optimised stock handling

low transport costs

*My benefit:*  
**Better gross margin**

# Better gross margin through optimising stock handling and low transport costs.

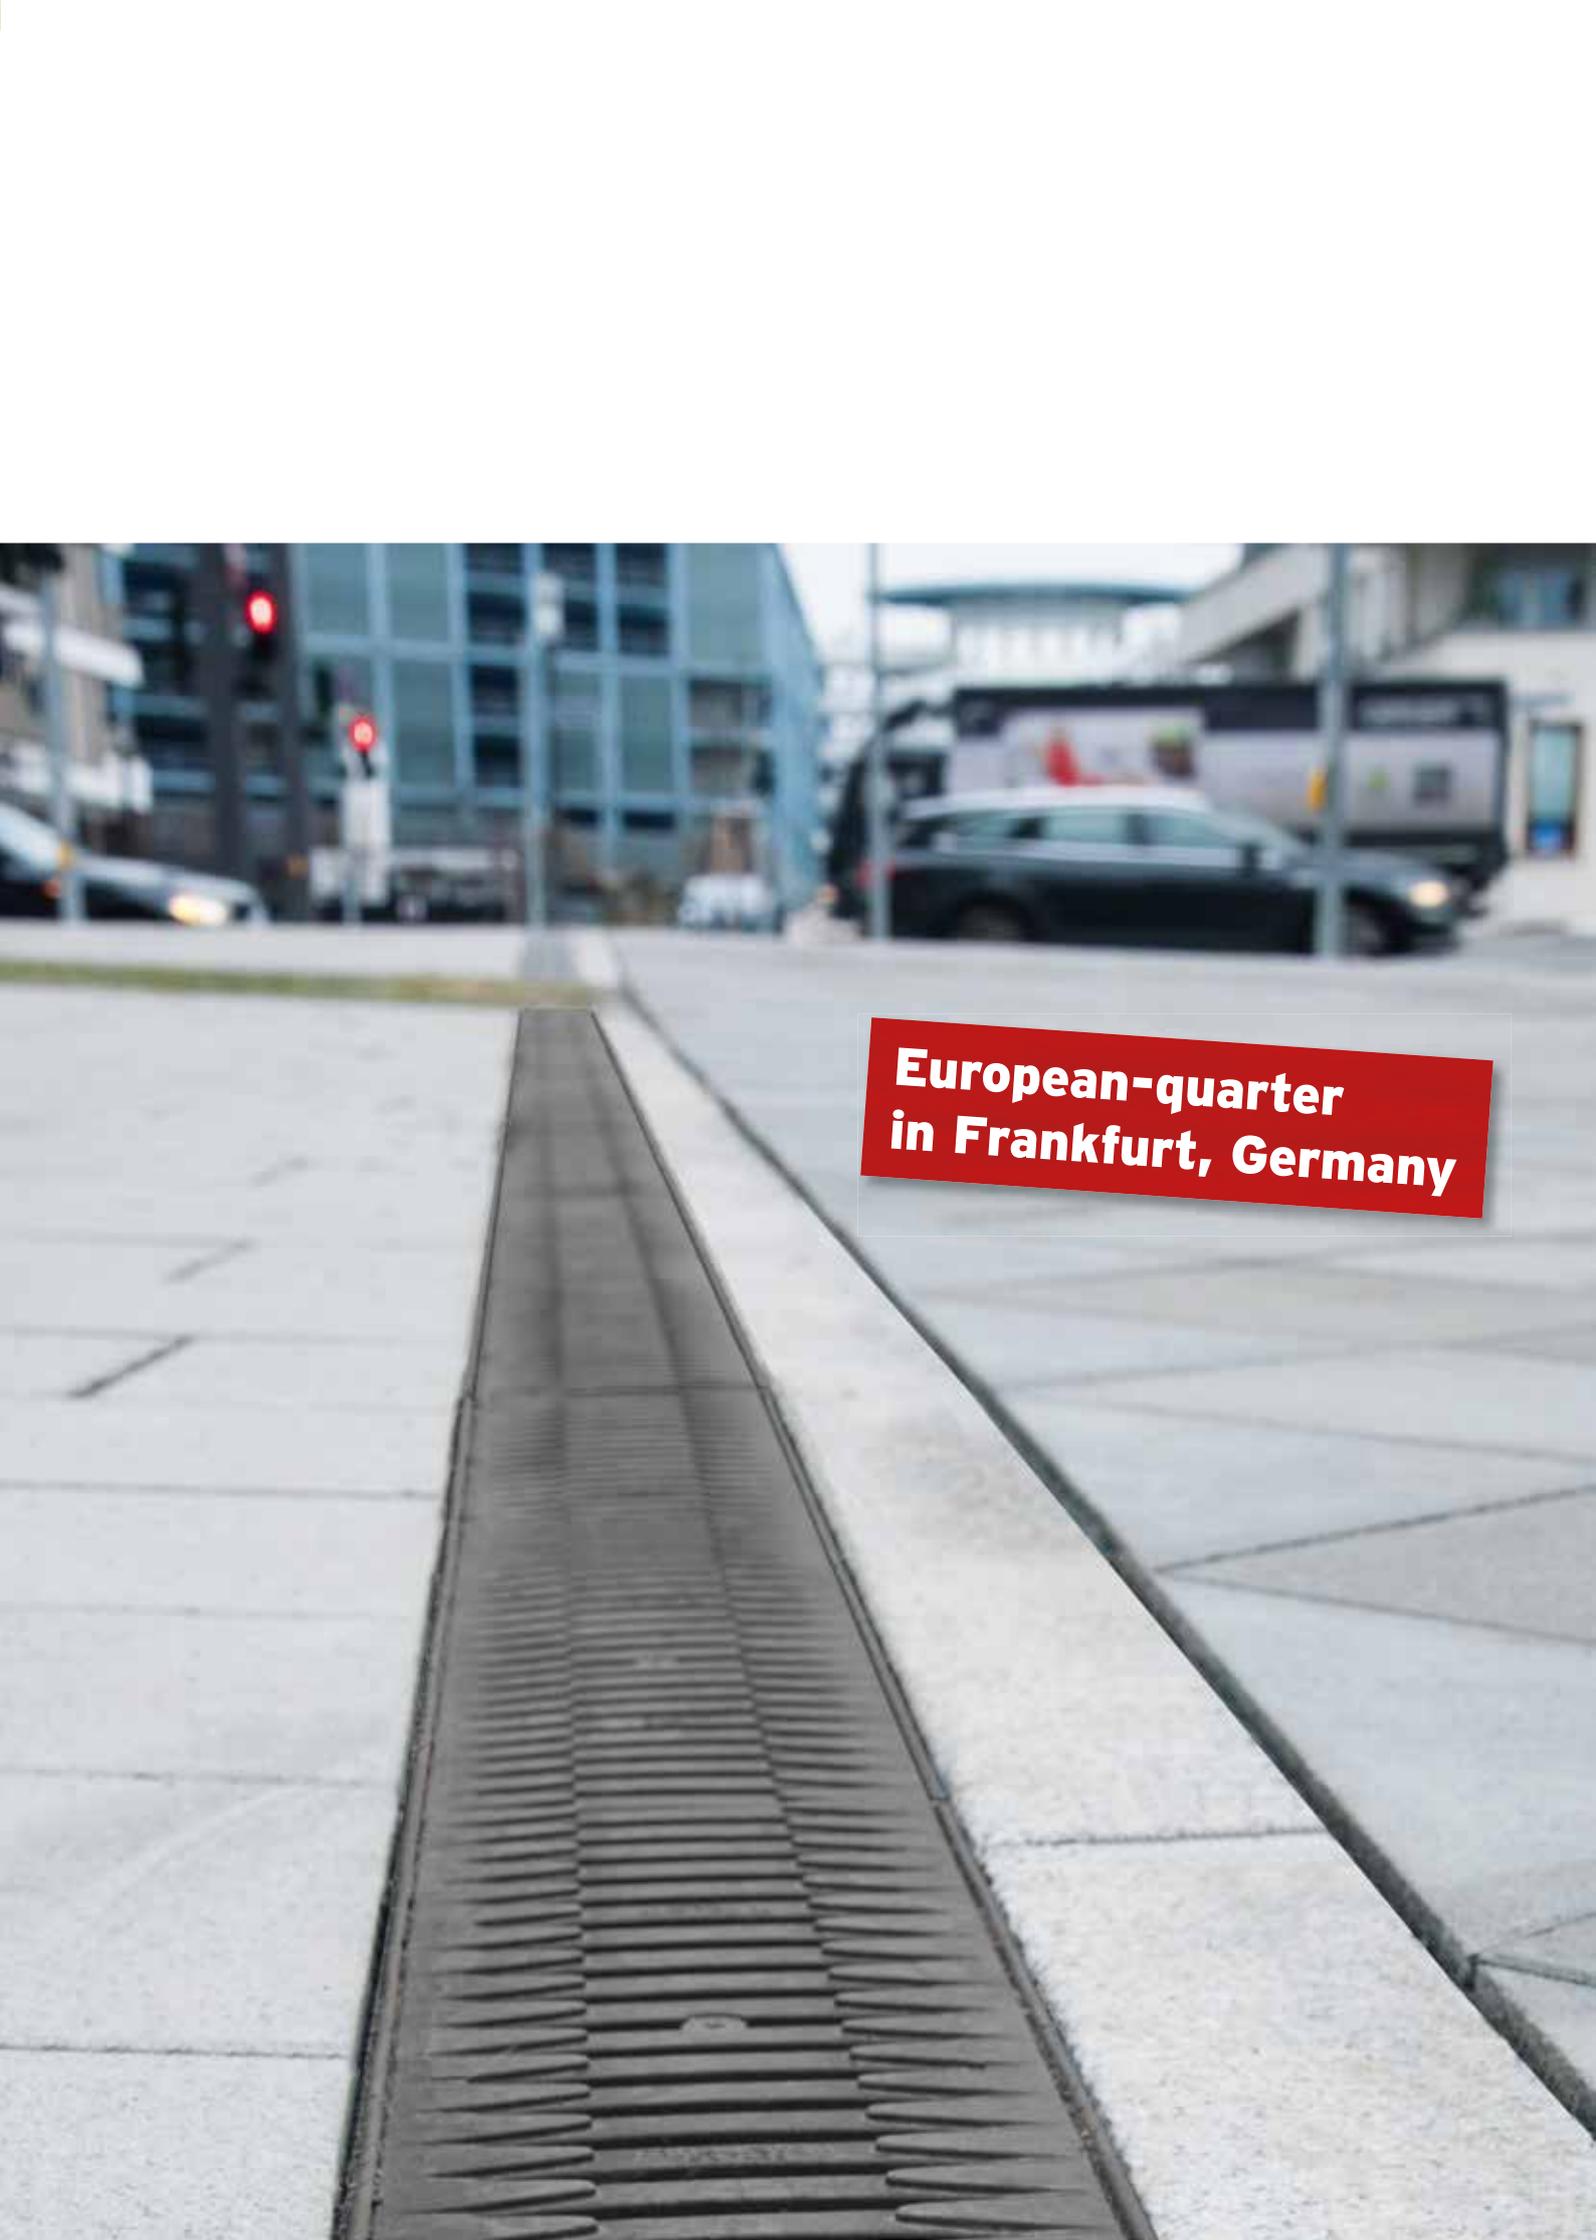

- easy loading without staff and forklift
- pre-assembled, no spare parts on stock
- fewer pallet storage lots required

# RECYFIX® PRO

Corrosion-free drainage channels for private and public areas.

**European-quarter  
in Frankfurt, Germany**

# RECYFIX® PRO

Corrosion-free drainage channels for private and public areas.

## 1 Requirements

Drainage channels for optically attractive areas have to

- be modern and unique in its design
- be extremely stable to guarantee long-term and permanent security
- be resistant to environmental influences (frost, heat and moisture)
- be dimensioned for high loading categories
- be designed in accordance with DIN EN 1433

## 3 Solutions

Therefore RECYFIX PRO channels are suitable for the drainage of sophisticated areas:

- channel and angle housing made of 100 % recycled composite
- secure and corrosion-free grating support
- loading capacity up to C 250
- hydraulically optimised FIBRETEC slotted grating

## 2 Application areas

- private and public areas
- squares and parks
- railway platforms
- driveways and parking lots
- reduced trafficked areas

**100% corrosion-free**

Platform in Limburg, Germany

EACT Academy in Oldham Manchester, UK

Car park Andritz group Vienna, Austria

School in Sunderland, UK

# YOUR BENEFITS WITH **RECYFIX®PRO**

## ANGLE HOUSING

- PP-angle housing 20 x 20 mm acc. to DIN 19580 for additional flexibility
- nibs to stop lateral movements
- inlaying gratings

**= PERFORMANCE ASSURED**

## LOW WEIGHT ENSURES EASY HANDLING ON SITE

- much lighter than channels made of polymer/resin concrete
- easy transport and installation

**= TIME & COST SAVINGS**

## HIGH RESISTANCE

- high resistance against frost, de-icing salt and UV-rays
- withstands high temperature differences
- for climate ranges from - 50 °C to + 80 °C and more

**= QUALITY ASSURED /  
LONGEVITY**

## HIGH-GRADE MATERIAL

- **RECYFIX®** - stable and almost unbreakable
- elastic and especially robust material
- withstands high loads and temperature differences in daily use
- 100 % recycled composite body (and also 100 % recyclable) → 100 % environmentally friendly
- 0 % water absorption
- smooth inner surface for superior flow characteristics
- non-conductive
- PP channel body can be cut, drilled and worked easily on site

**= QUALITY & PERFORMANCE ASSURED**

## PRE-ASSEMBLED READY FOR INSTALLATION

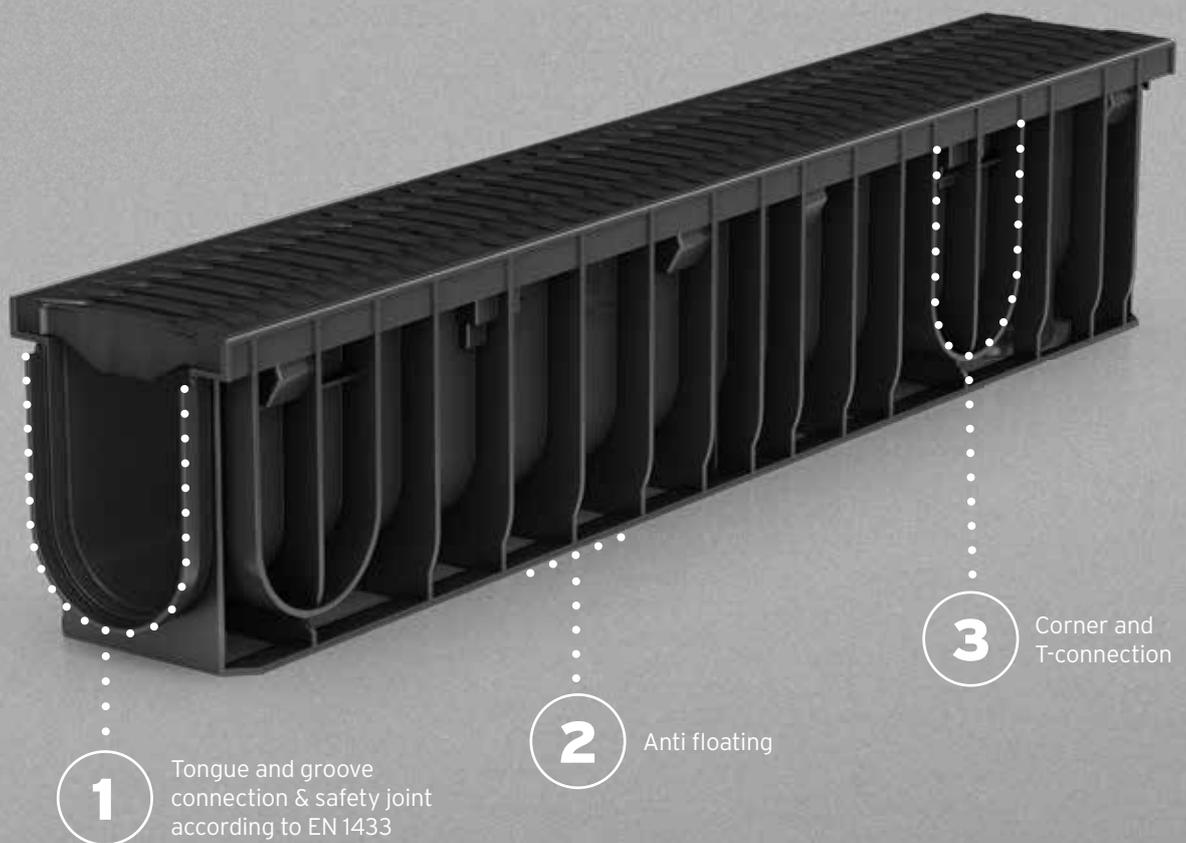

- channel and grating = one part
- no spare parts
- easy handling in stock and on construction site
- cost-efficient transport

**= BETTER GROSS MARGIN**

**IDEAL FOR ...**

applications with corrosion-free linear drainage for private and public areas, such as parks, driveways and parking lots.

**100 % corrosion-free**

# RECYFIX® PRO

Corrosion-free drainage channels for private and public areas.

## Modern office complex in Düsseldorf is drained with RECYFIX® PRO.

### RECYFIX® PRO

In the centre of Düsseldorf, Germany on the area of some old barracks a new business world - named after the artist couple Clara & Robert Schumann - has arisen. Two new seven-storey buildings were built with the historical Saarkhaus where parts of the old facade were preserved and framed within the new facade of the modern office complex. The modern office complex offers a rental area of 16,500 square metres. Modern locations require modern drainage concepts. Around 300 metres of the RECYFIX PRO 100 type 010 have been installed with a ductile iron longitudinal grating in KTL.

### The benefit for Landscaping Architects:

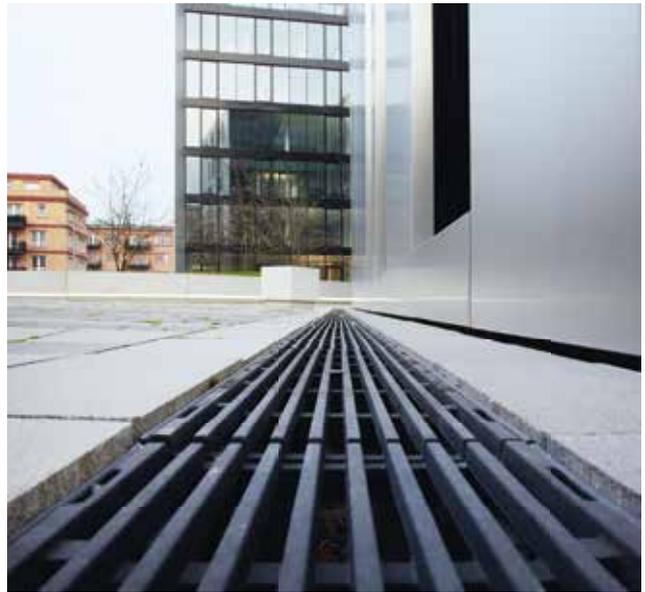

- Security in design and material
  - durable and reliable drainage system
  - fulfills all norms
- Harmonious architecture:
  - the filigree ductile iron longitudinal gratings blend in with the pavement and the anthracite-coloured windows

### The benefit for Landscape Gardeners:

- Cost savings and back-friendly installation
  - low weight
  - easy installation and processing (cutting of fitting pieces and mitres)
  - easy transport to the construction site

**Clara & Robert  
office complex,  
Düsseldorf, Germany**

# RECYFIX® PRO

Corrosion-free drainage channels for private and public areas.

RECYFIX PRO channels meet the requirements of DIN EN 1433 and are suitable for the following load categories:

Category A 15, Load class 15 kN

Category B 125, Load class 125 kN

Category C 250, Load class 250 kN

Category D 400, Load class 400 kN

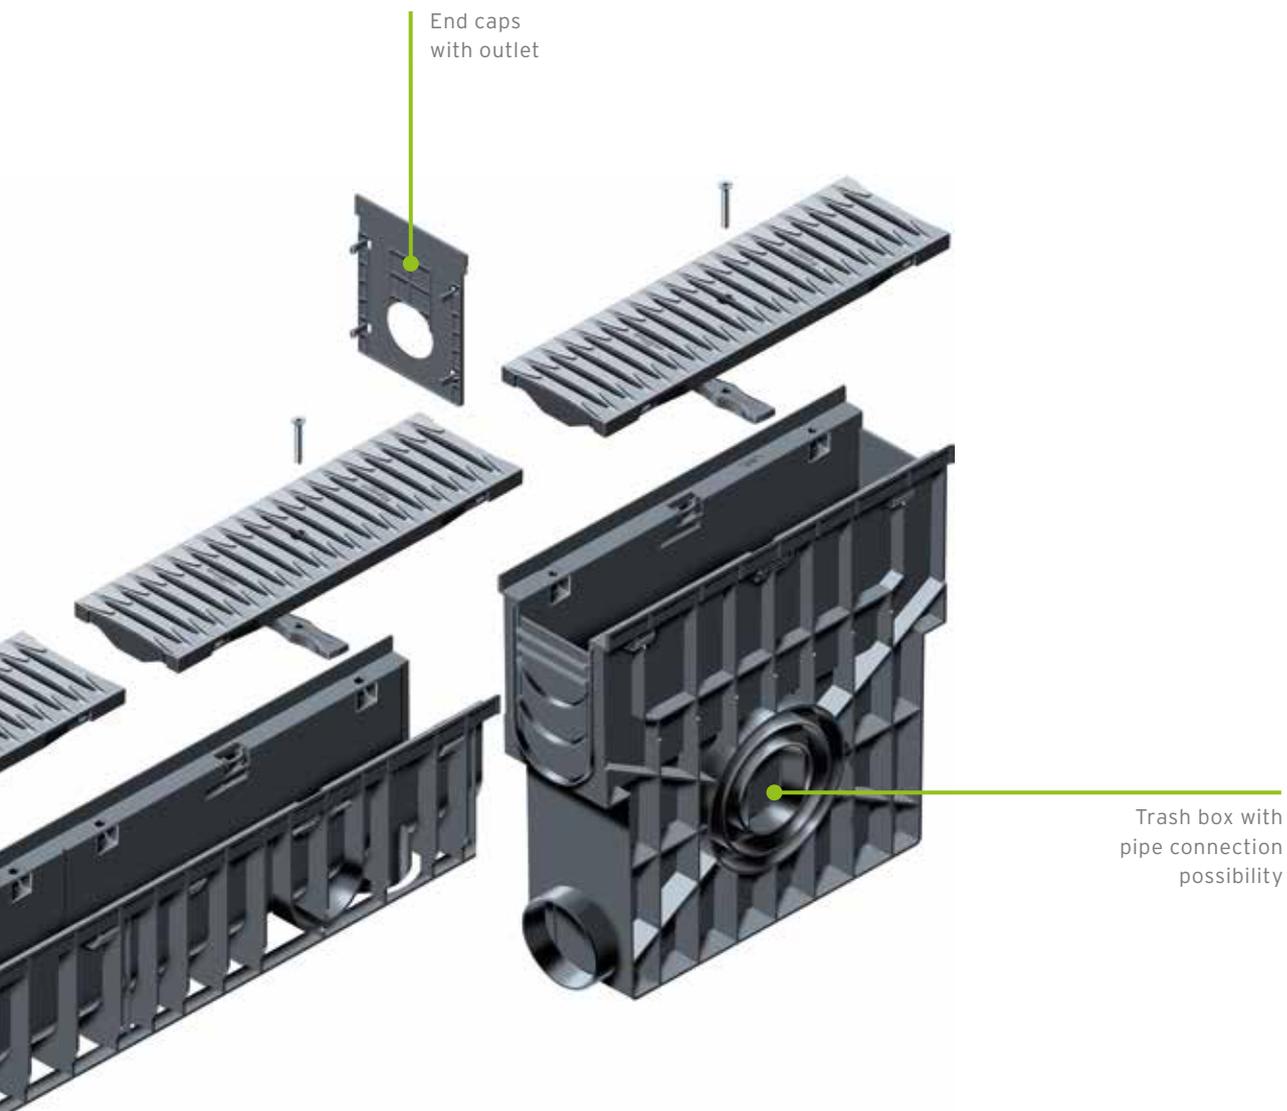

If in doubt, the higher category should be used.

Various grating options,  
for example **FIBRETEC**  
slotted grating

Channel with PP-angle  
housing and ridges  
to stop any lateral  
movement

Channels made of PP, according to  
DIN V 19580 / EN 1433, CE-conform,  
with tongue and groove connection  
for exact installation

End caps  
without outlet

# The new style of drainage!

Artistically combined, uniquely attractive: coloured **FIBRETEC®** gratings.

# FIBRETEC®

The art of drainage has many styles. With the coloured FIBRETEC® gratings, HAURATON creates a completely new scope of design.

The unique channel gratings in the colours Fern, Sand and Stone can be combined with different materials. Thus, new compositions of colours and textures can always be created. As desired, the coloured FIBRETEC gratings can accentuate the colour composition of the surroundings or harmonise as a complete work of art.

Inspiration for the new gratings was the proven black FIBRETEC which has received various awards since its introduction in 2010. One of which is the International Design Award Baden-Württemberg Focus Open.

The production of the coloured FIBRETEC gratings in the colours Fern, Sand and Stone is done with coloured granulate. The result is uniformly coloured gratings which are particularly weather and UV-resistant. This was tested and approved in the laboratory according to DIN EN ISO 4892-2 as required by DIN 19580: The gratings were exposed to artificial weathering for a total of 1,600 hours in the form of xenon arc radiation and irrigation.

The subsequent mechanical tests were very successful - optical changes were hardly measurable. However, slight long-term colour changes in the material cannot be ruled out.

**FIBRETEC® in Fern**

**FIBRETEC® in Sand**

**FIBRETEC® in Stone**

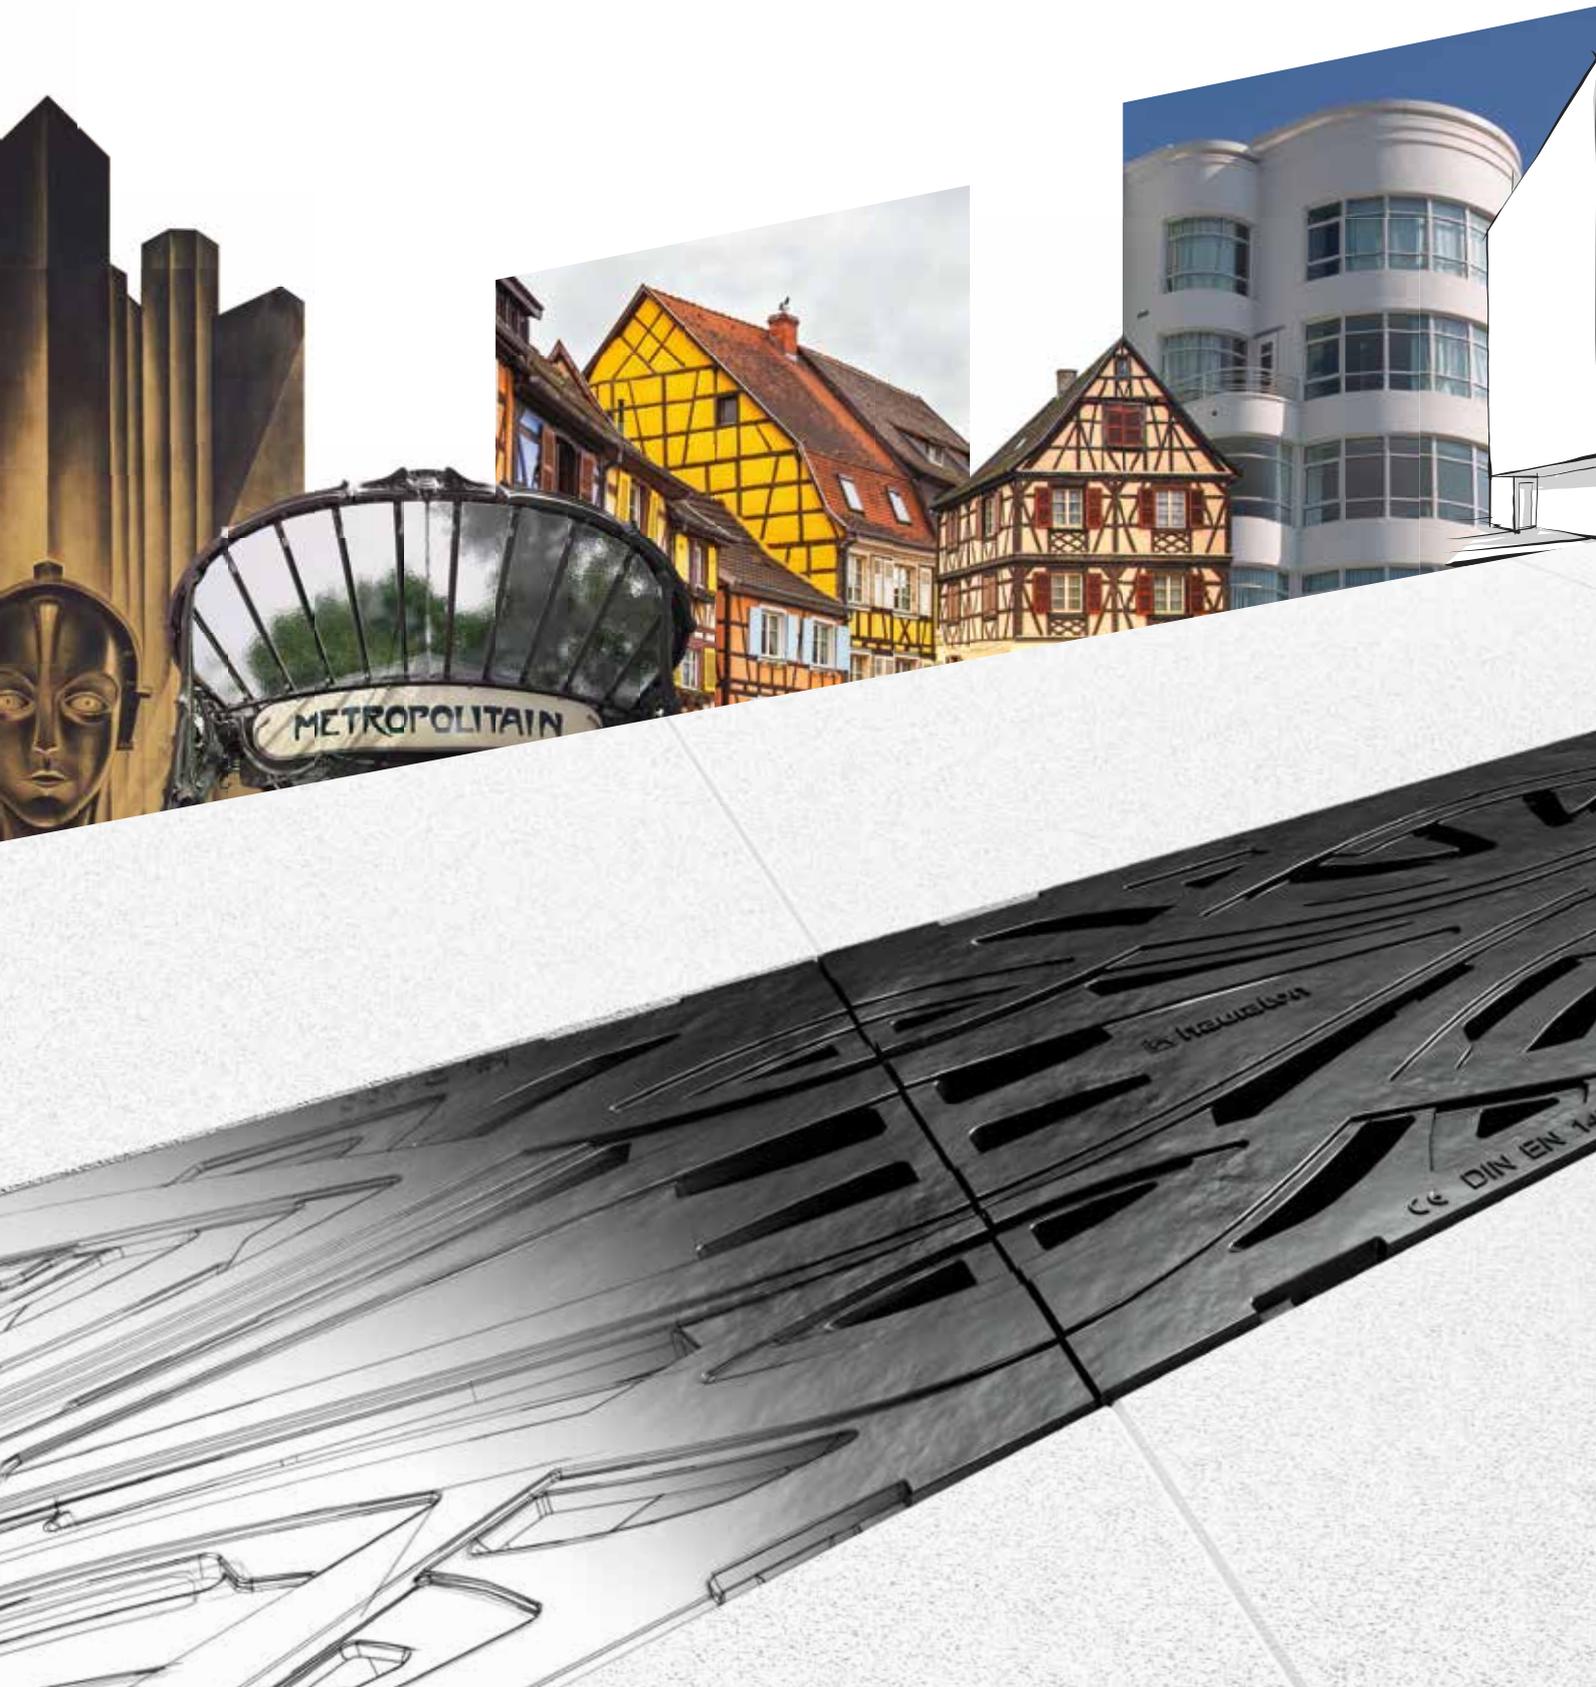

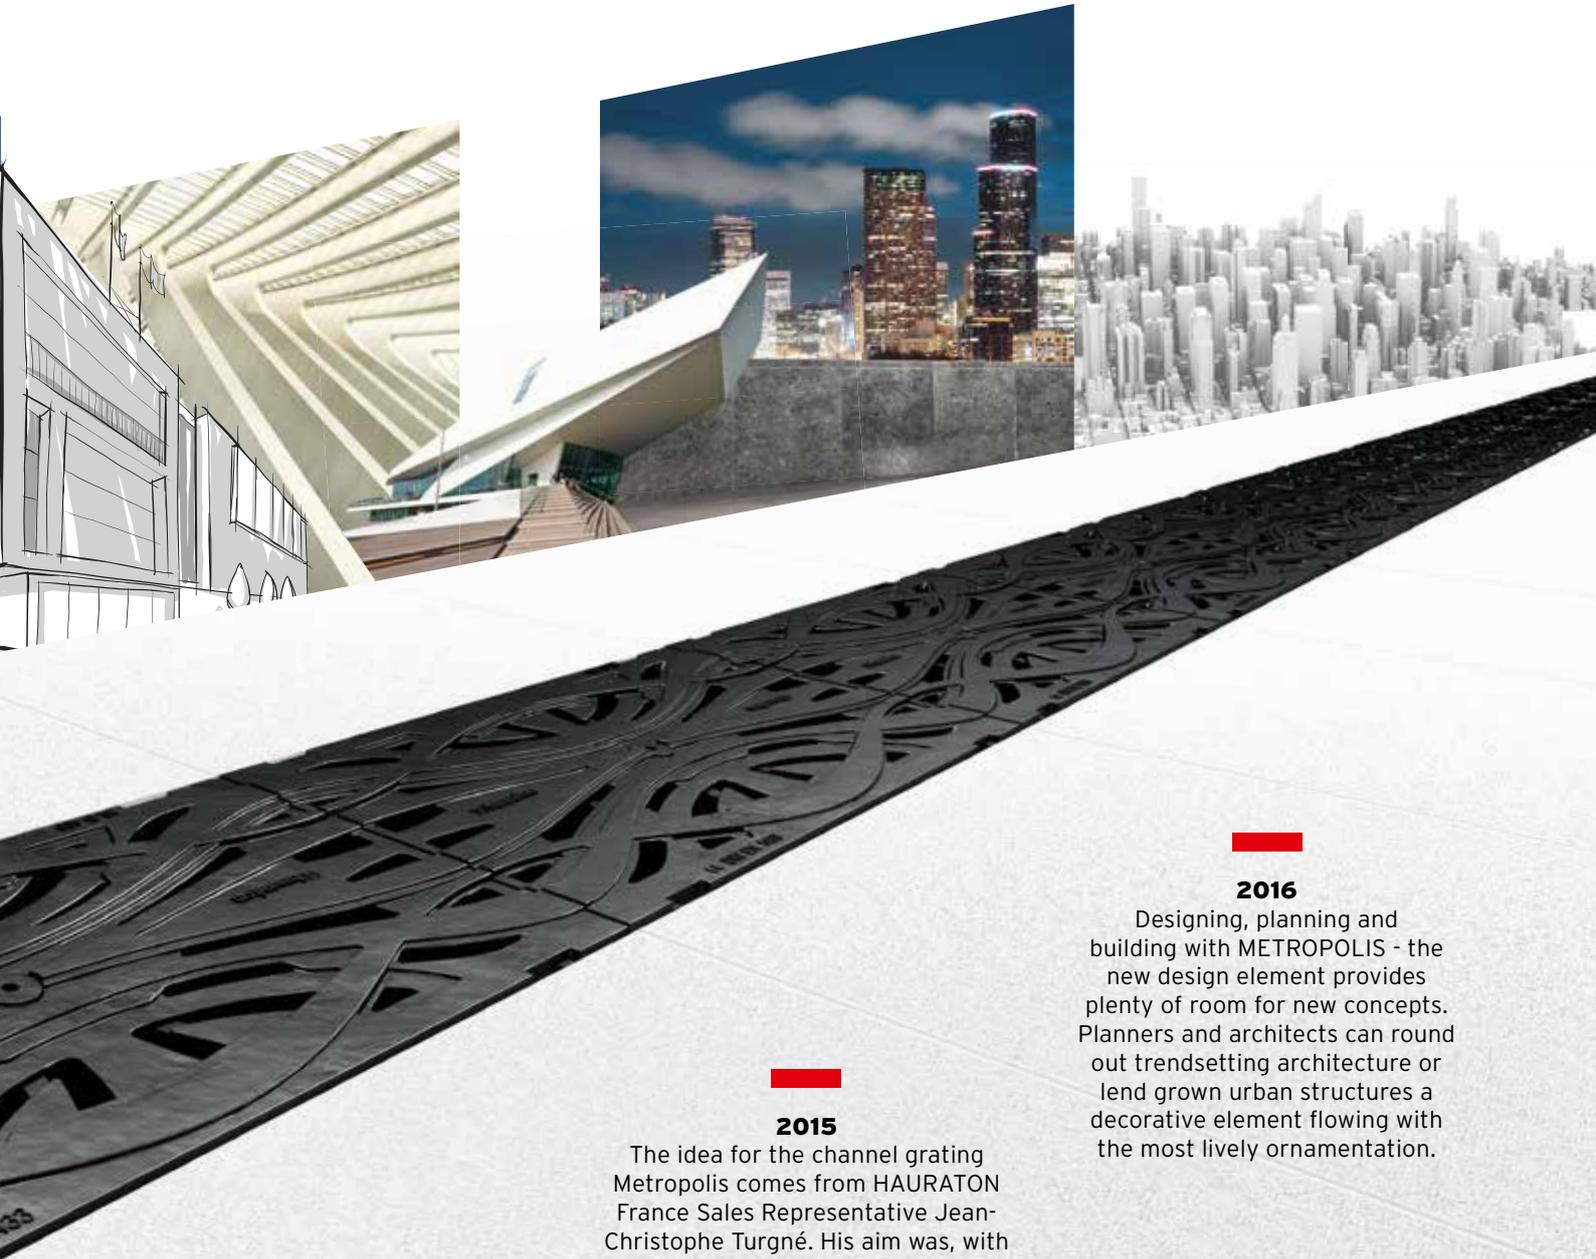

**FIBRETEC® in Black**

# METROPOLIS

Inspired from history - Made for the future

**1927**

The movie 'Metropolis', by Fritz Lang, has influenced various genres since its creation in 1927. With the expressionist representation of a futuristic metropolis, the film producer developed a leitmotif that still inspires artists and designers today.

**2015**

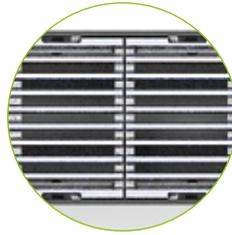

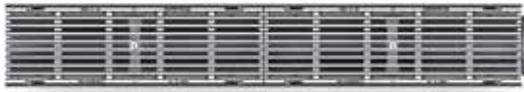

The idea for the channel grating Metropolis comes from HAURATON France Sales Representative Jean-Christophe Turgné. His aim was, with a functional component such as the drainage channel, to set standards with respect to aesthetics and to impart specific construction projects with futuristic, decorative details.

**2016**

Designing, planning and building with METROPOLIS - the new design element provides plenty of room for new concepts. Planners and architects can round out trendsetting architecture or lend grown urban structures a decorative element flowing with the most lively ornamentation.

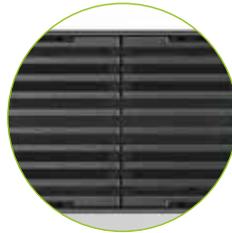

## Grating options

### RECYFIX® PRO 100

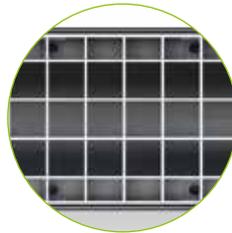

#### Longitudinal ductile iron gratings, galvanised

Bar distance: 9 mm

#### Longitudinal ductile iron gratings, KTL

Bar distance: 9 mm

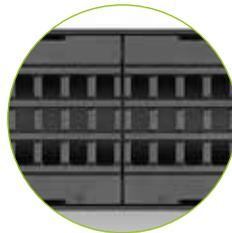

#### Mesh gratings, galvanised

Mesh width: 30 x 30 mm

#### Slotted gratings and reinforced slotted gratings, galvanised and stainless steel

Bar distance: 80 x 10 mm

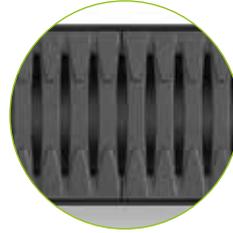

#### GUGI-Mesh gratings, composite material

Mesh width: 15 x 25 mm

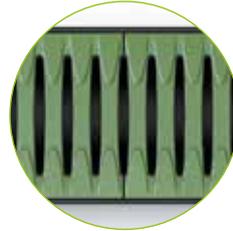

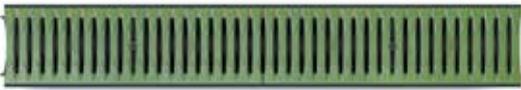

#### Ductile iron grating, METROPOLIS, KTL

# RECYFIX® PLUS

Drainage channels with a sophisticated look for public and commercial areas.

**Conference-Centre ICE  
Cracow, Poland**

# RECYFIX® PLUS

Drainage channels with a sophisticated look for public and commercial areas.

## 1 Requirements

Drainage channels in commercial and public areas have to

- permanently withstand the daily stress of cars, trucks and pedestrians
- be optically attractive
- withstand weather influences (frost, heat, humidity)
- be in accordance with DIN EN 1433

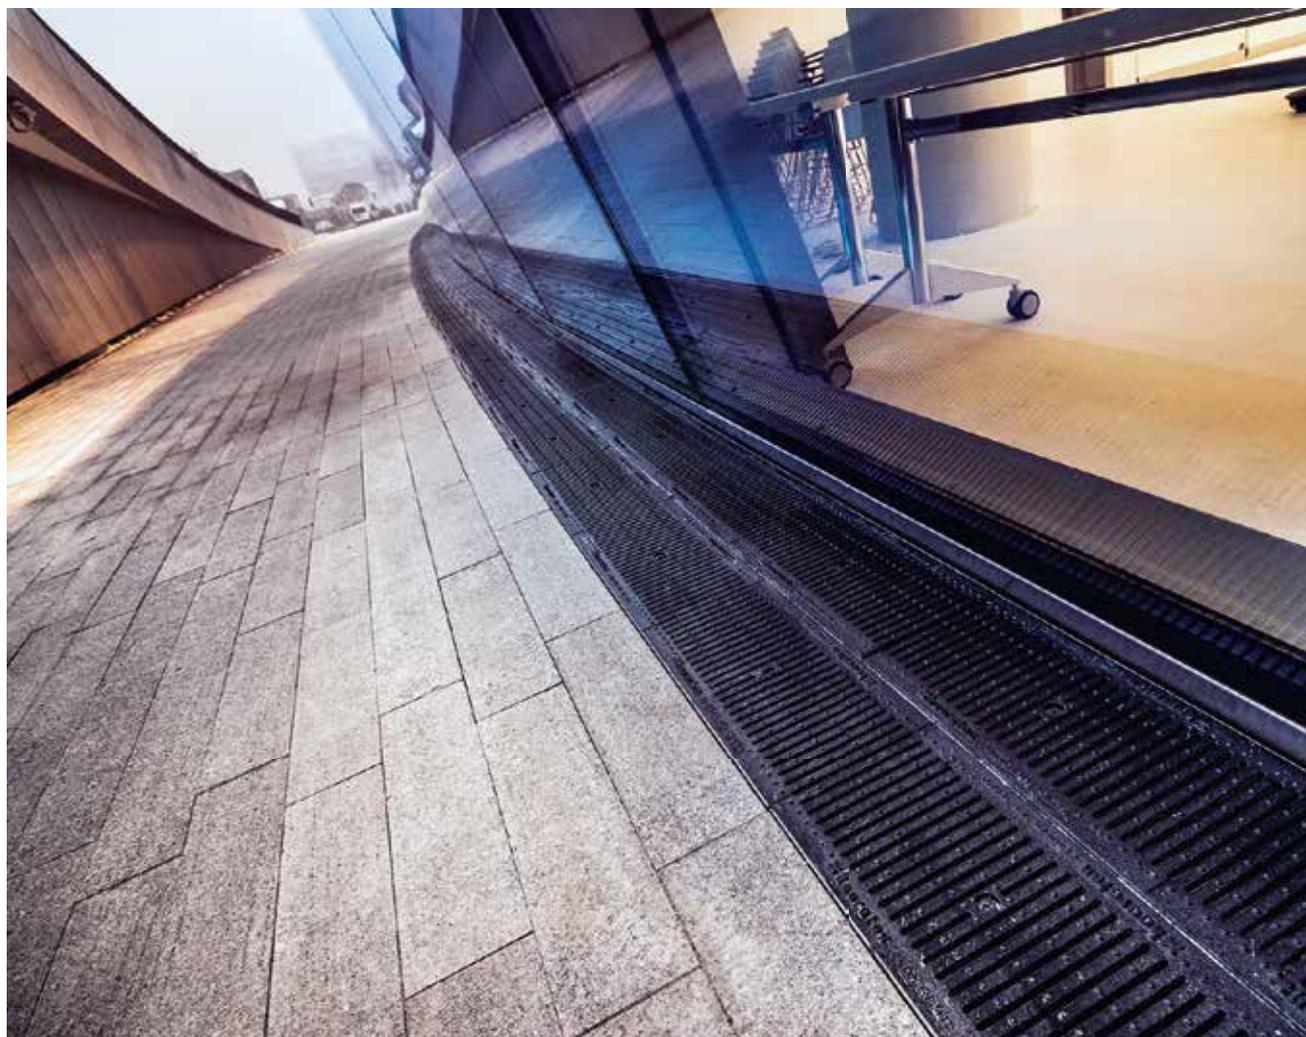

## 2 Application areas

- public and commercial areas
- trafficked areas with higher loadings

## 3 Solutions

Therefore RECYFIX PLUS channels are suitable for the drainage of public and commercial areas:

- stable channels made of 100% recycled PE
- torsion-resistant ribs and steel frames for high stability
- corrosion-protected frames made of galvanised or stainless steel
- optical appreciation through visible steel frame

# YOUR BENEFITS WITH RECYFIX® PLUS

## FRAME SYSTEM

- integrated galvanised or stainless steel frames
- protection against longitudinal and lateral movements of gratings

= **PERFORMANCE ASSURED**

## PRE-ASSEMBLED READY FOR INSTALLATION

- channel and grating = one part
- no spare parts
- easy handling in stock and on construction site
- cost-efficient transport

= **BETTER GROSS MARGIN**

## HIGH RESISTANCE

- high resistance against frost, de-icing salt and UV rays
- withstands high temperature differences
- for climate ranges from - 50 °C to + 80 °C and more

= **QUALITY ASSURED / LONGEVITY**

## LOW WEIGHT ENSURES EASY HANDLING ON SITE

- much lighter than channels made of polymer/resin concrete
- easy transport and installation

= **COST SAVINGS**

## HIGH-GRADE MATERIAL

- **RECYFIX®** - stable and almost unbreakable
- elastic and especially robust material
- withstands high loads and temperature differences in daily use
- 100 % recycled composite body (and also 100 % recyclable)  
→ 100% environmentally friendly
- 0 % water absorption
- smooth inner surface for superior flow characteristics
- PP channel body can be cut, drilled and worked easily on site

= **QUALITY & PERFORMANCE ASSURED**

## HIGH STABILITY

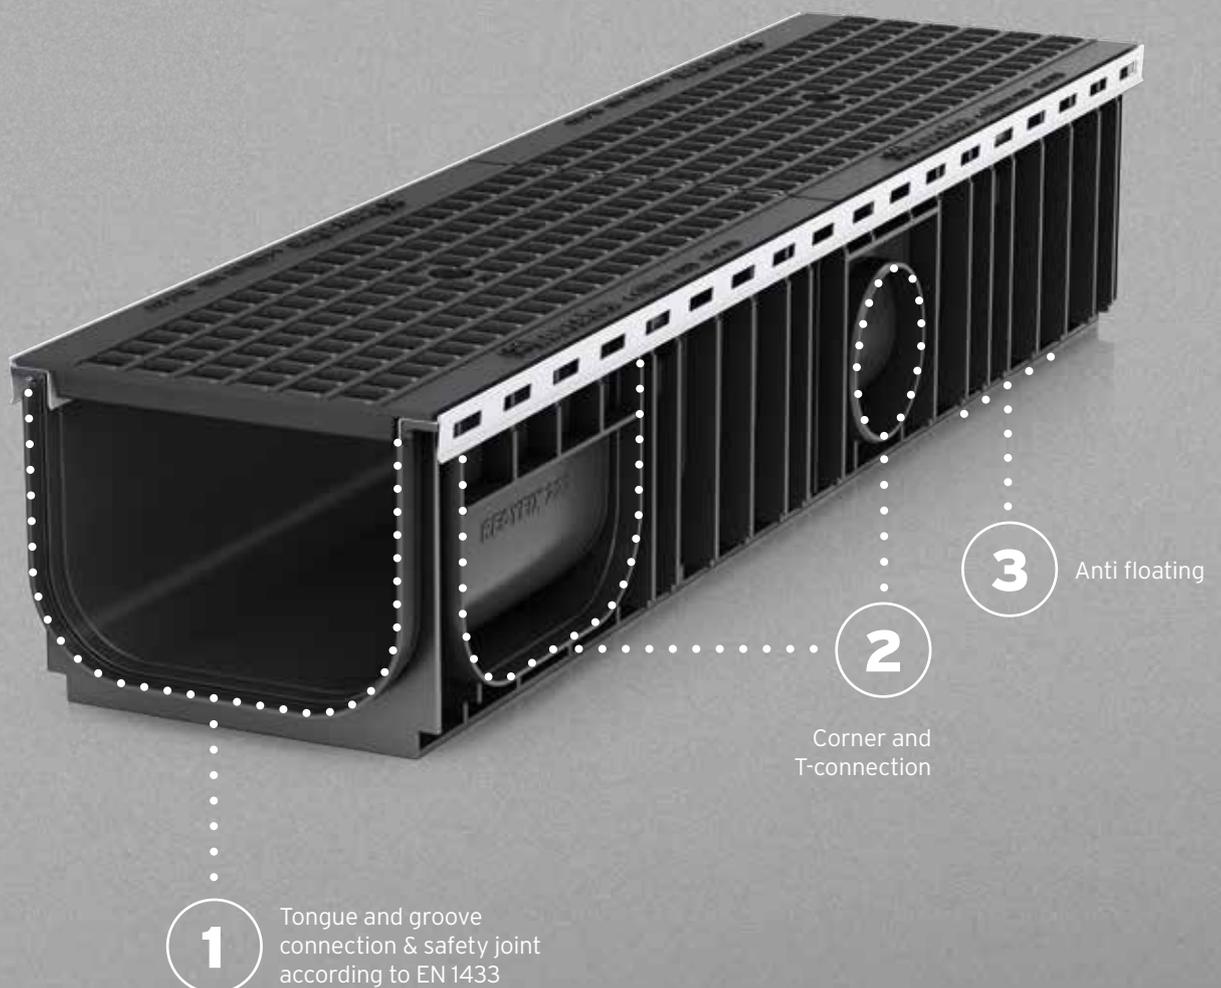

- proven structural design for superior resistance to dynamic forces and load class C 250
- various ductile iron gratings in loading classes from class A 15 to C 250 according to DIN EN 1433
- stable and durable drainage channel with protective edge

= **PERFORMANCE ASSURED**

**IDEAL FOR ...**

applications with higher traffic up to class D 400, such as car parks, industrial estates and sewage plants.

# RECYFIX®PLUS

## RECYFIX®PLUS channels provide for state-of-the-art drainage at the Vodafone campus in Düsseldorf

### Durable and free of corrosion:

#### Facade and terrace drainage using RECYFIX PLUS.

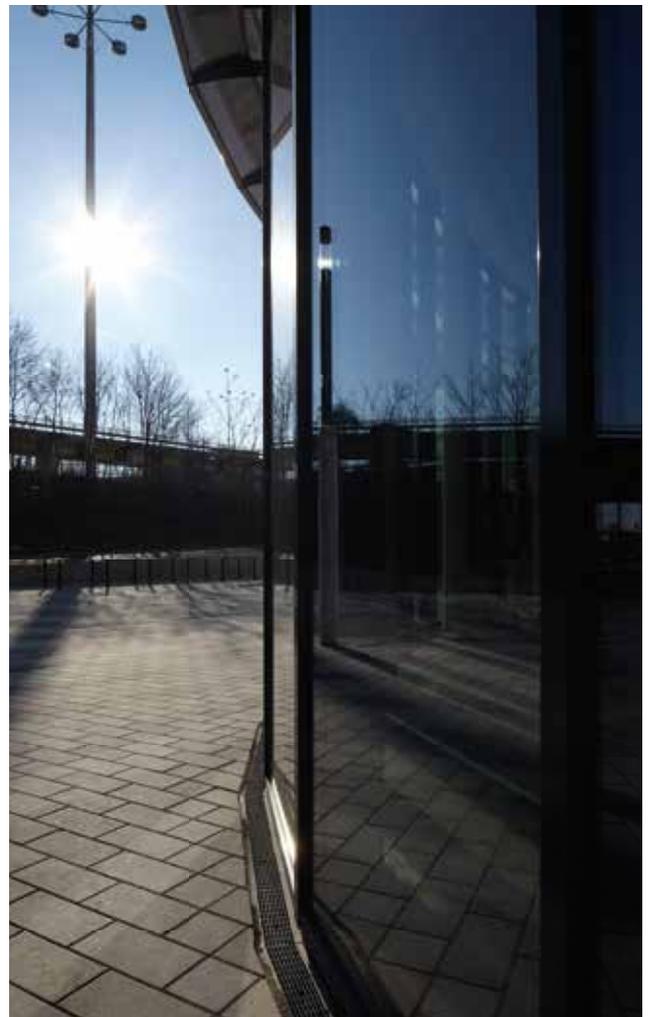

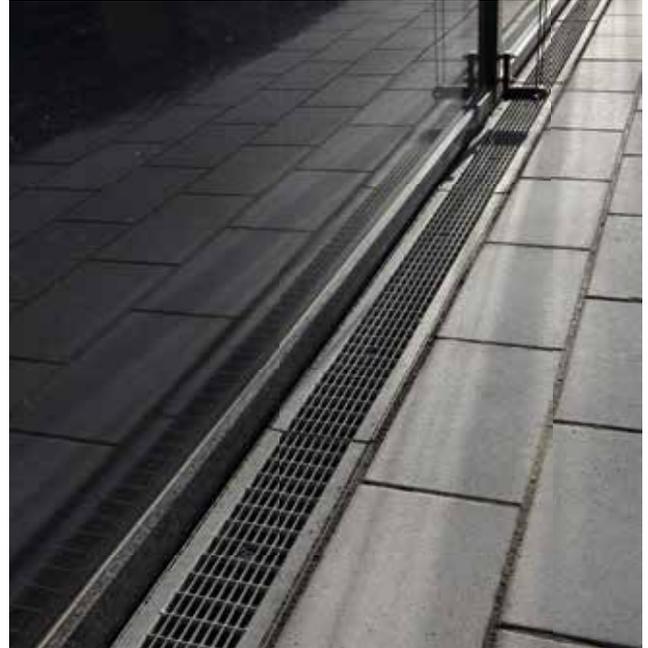

The Vodafone campus - a state-of-the-art office complex with workplaces for more than 5000 employees. More than 300 million euros have been invested in bringing different sites together at the new head office. The building was designed and implemented in accordance with the criteria of the seal of quality for sustainable construction LEED Gold (Leadership in Energy and Environmental Design).

### Reasons for using nearly 700 metres of RECYFIX®PLUS:

- Low construction costs
  - Ease of installation and processing polygonal laying rather than radial tailor-made channel
- Ecological material
  - Recycled PP
  - Extremely detailed specifications with regard to material origin, material composition and manufacturing procedure
- Elegant appearance
  - Continuous metal edge on surface
  - Mesh gratings with no interfering little plates containing manufacturer details and load specifications

# RECYFIX® PLUS

Drainage channels with a sophisticated look for public and commercial areas.

RECYFIX PLUS channels meet the requirements of DIN EN 1433 and are suitable for the following load categories:

### Category A 15, Load class 15 KN

Trafficked areas, which are exclusively used by pedestrians and cyclists

### Category B 125, Load class 125 kN

Sidewalks, pedestrian areas and comparable areas, car parks or car parking decks

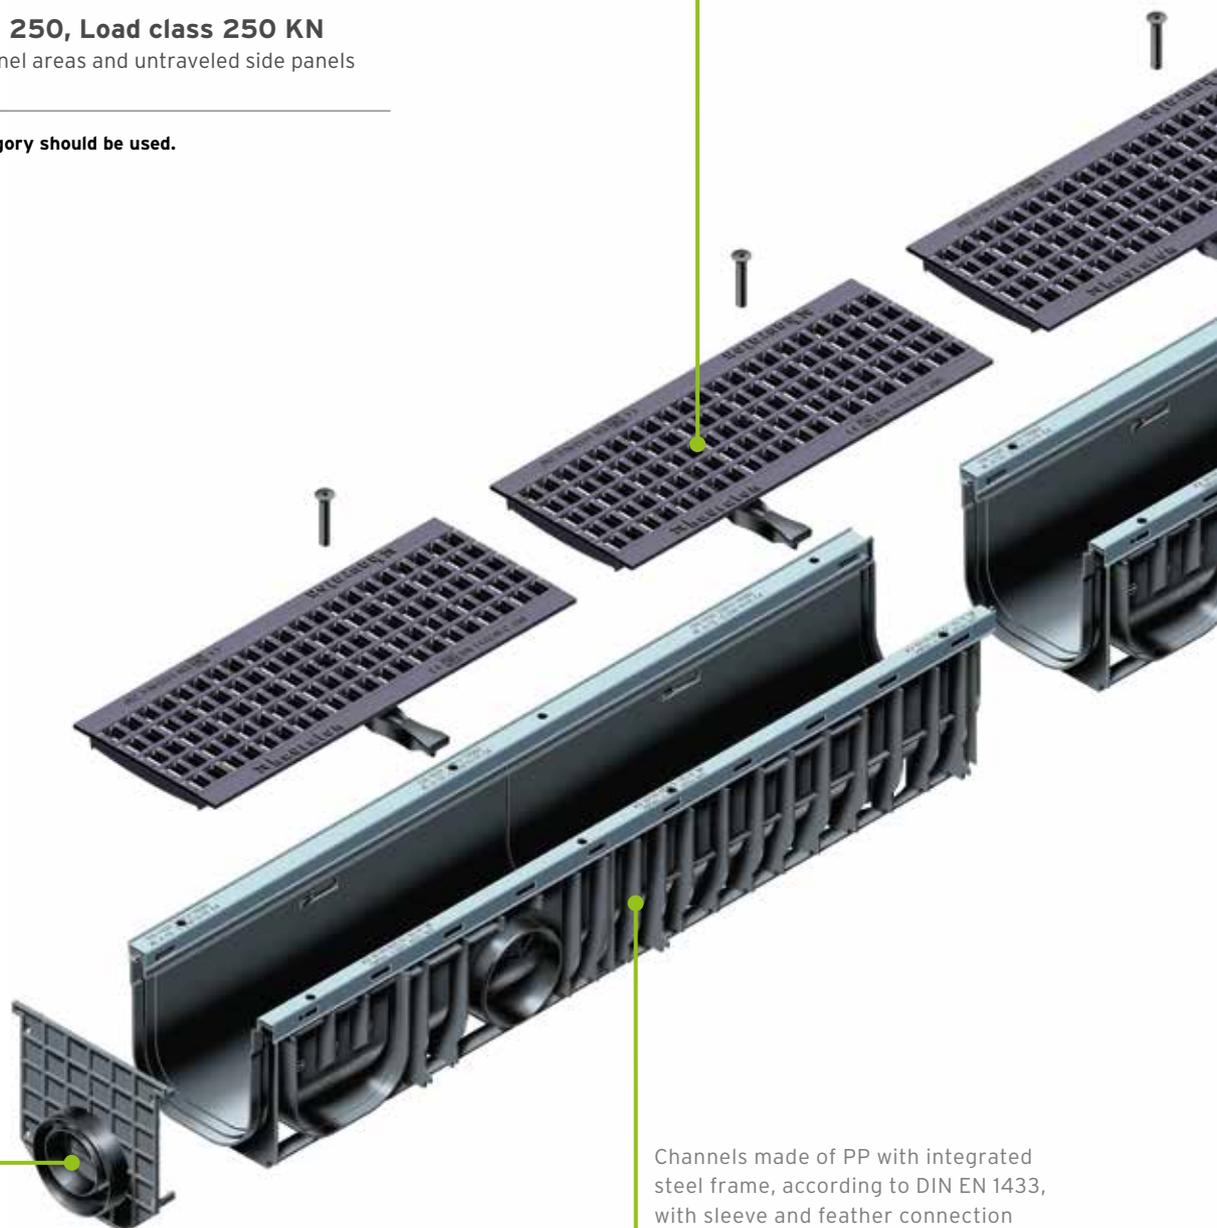

### Category C 250, Load class 250 KN

Sidewalk channel areas and untraveled side panels or similar

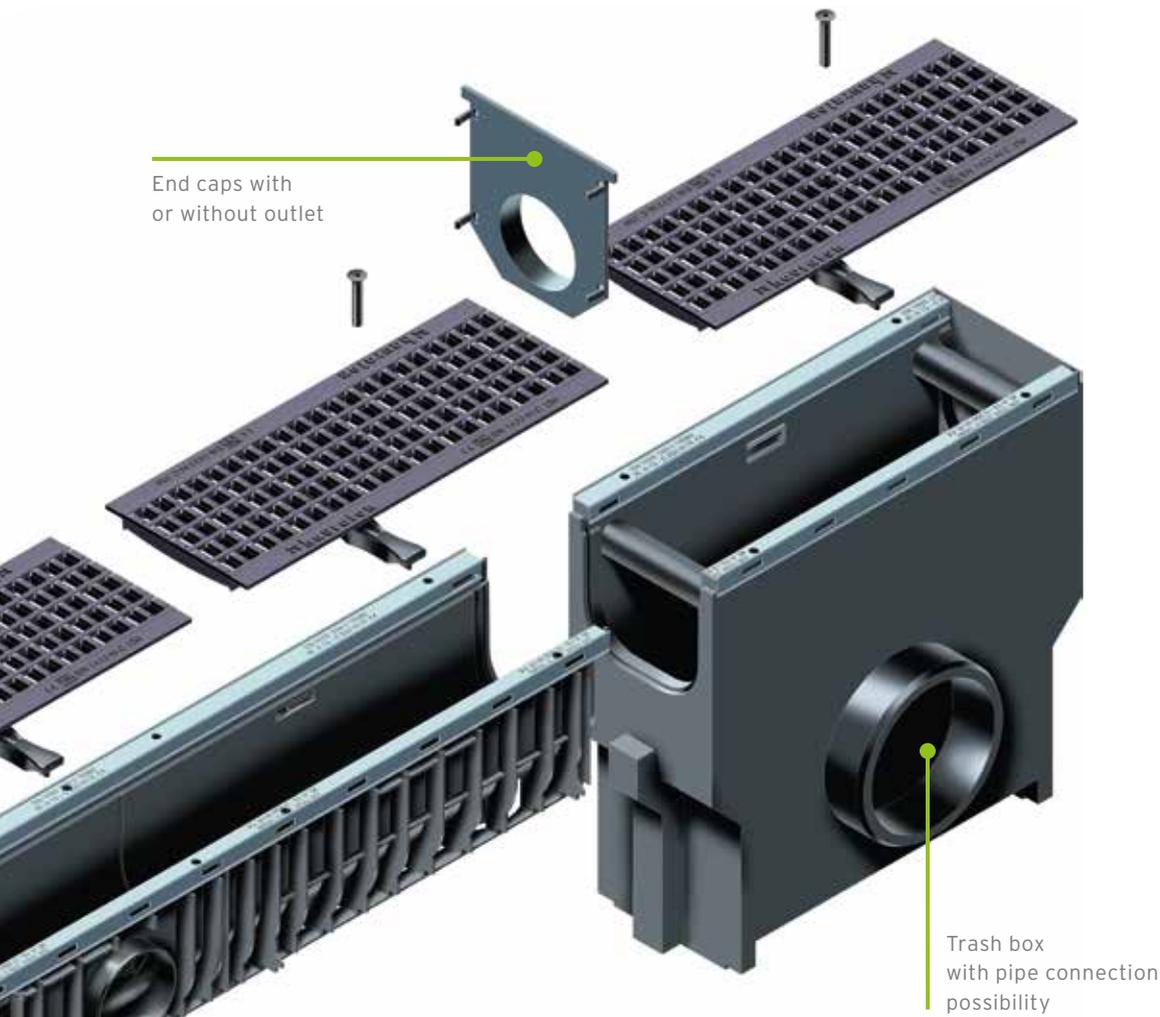

If in doubt, the higher category should be used.

Different grating options, i.e. GUGI-Ductile iron mesh gratings

End caps with or without outlet

Channels made of PP with integrated steel frame, according to DIN EN 1433, with sleeve and feather connection for exact installation, combined article with various grating possibilities

# Your way to the tender text on hauraton.com

## 1 Go to the product page.

- Choose your item.

The screenshot shows the hauraton.com website interface. The main product page for 'RECYFIX@PRO 100' is displayed. A callout box with a green border and the text 'Tender text' points to a button labeled 'Tender text' in the product navigation menu. The menu includes options like 'Product image', 'Technical drawing', 'Top view', 'Declaration of Performance', and 'Tender text'. Below the menu, there is a table of product specifications and a 'Collect documents' button.

# RECYFIX® STANDARD

Drainage channel for domestic applications around the house and garden.

**Private estate,  
Germany**

# RECYFIX® STANDARD

Drainage channel for domestic applications around the house and garden.

## 1 Requirements

Drainage channels in private areas have to

- permanently withstand the daily stress of cars and pedestrians
- be easy to transport and install
- withstand weather influences (frost, heat, humidity)
- be optically attractive
- be in accordance with DIN EN 1433

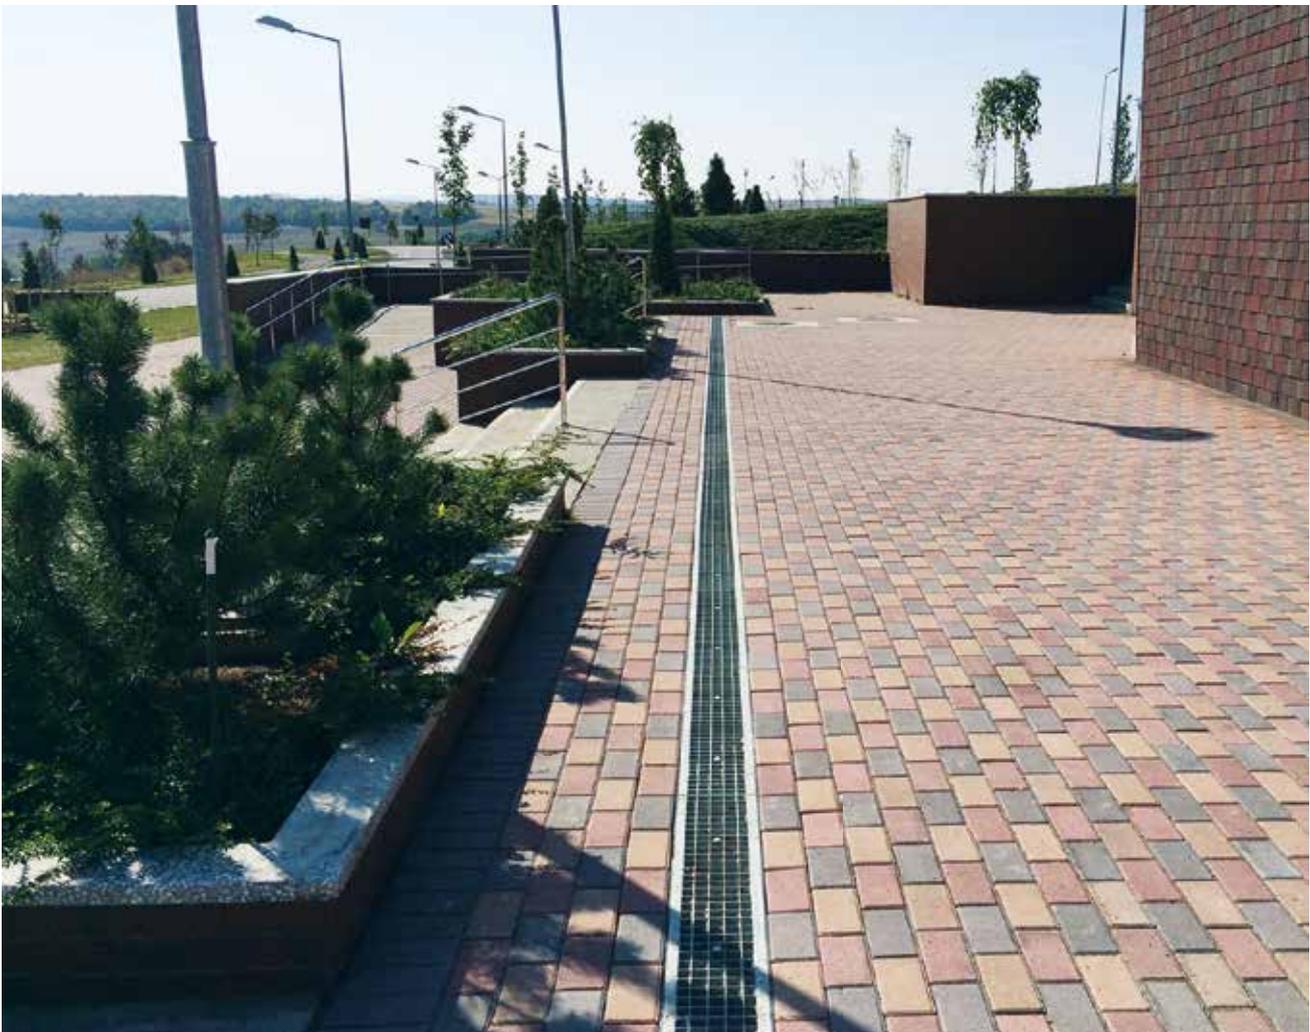

## 2 Application areas

- predominantly private areas
- driveways
- courtyards
- terraces
- gardens
- parks

## 3 Solutions

Therefore RECYFIX STANDARD channels are suitable for the drainage of private areas

- high stability and functionality
- low weight
- preformed vertical and horizontal outlets
- nominal sizes from 100 to 300 mm with different heights
- stable gratings in loading classes A 15 up to C 250 according to DIN EN 1433

# YOUR BENEFITS WITH **RECYFIX®** STANDARD

## FRAME SYSTEM

- PP frame to stop lateral movements
- enables flush connection with gratings which prevents injuries

**= QUALITY & PERFORMANCE ASSURED**

## HIGH-GRADE MATERIAL

- **RECYFIX®** - stable and almost unbreakable
- elastic and especially robust material
- withstands high loads and temperature differences in daily use
- 100 % recycled composite body (and also 100 % recyclable)  
→ 100 % environmentally friendly
- 0 % water absorption
- smooth inner surface for superior flow characteristics
- PP channel body can be cut, drilled and worked easily on site

**= QUALITY & PERFORMANCE ASSURED**

## LOW WEIGHT ENSURES EASY HANDLING ON SITE

- much lighter than channels made of polymer/resin concrete
- easy transport and installation

**= TIME & COST SAVINGS**

## NUMEROUS GRATING OPTIONS

- made of ductile iron, galvanised or stainless steel
- narrow slot width for pedestrian areas available
- stable gratings in loading classes A 15 up to C 250 according to DIN EN 1433

**= DESIGN FLEXIBILITY**

## PRE-ASSEMBLED READY FOR INSTALLATION

- channel and grating = one part
- no spare parts
- easy handling in stock and on construction site
- cost-efficient transport

**= BETTER GROSS MARGIN**

## HIGH RESISTANCE

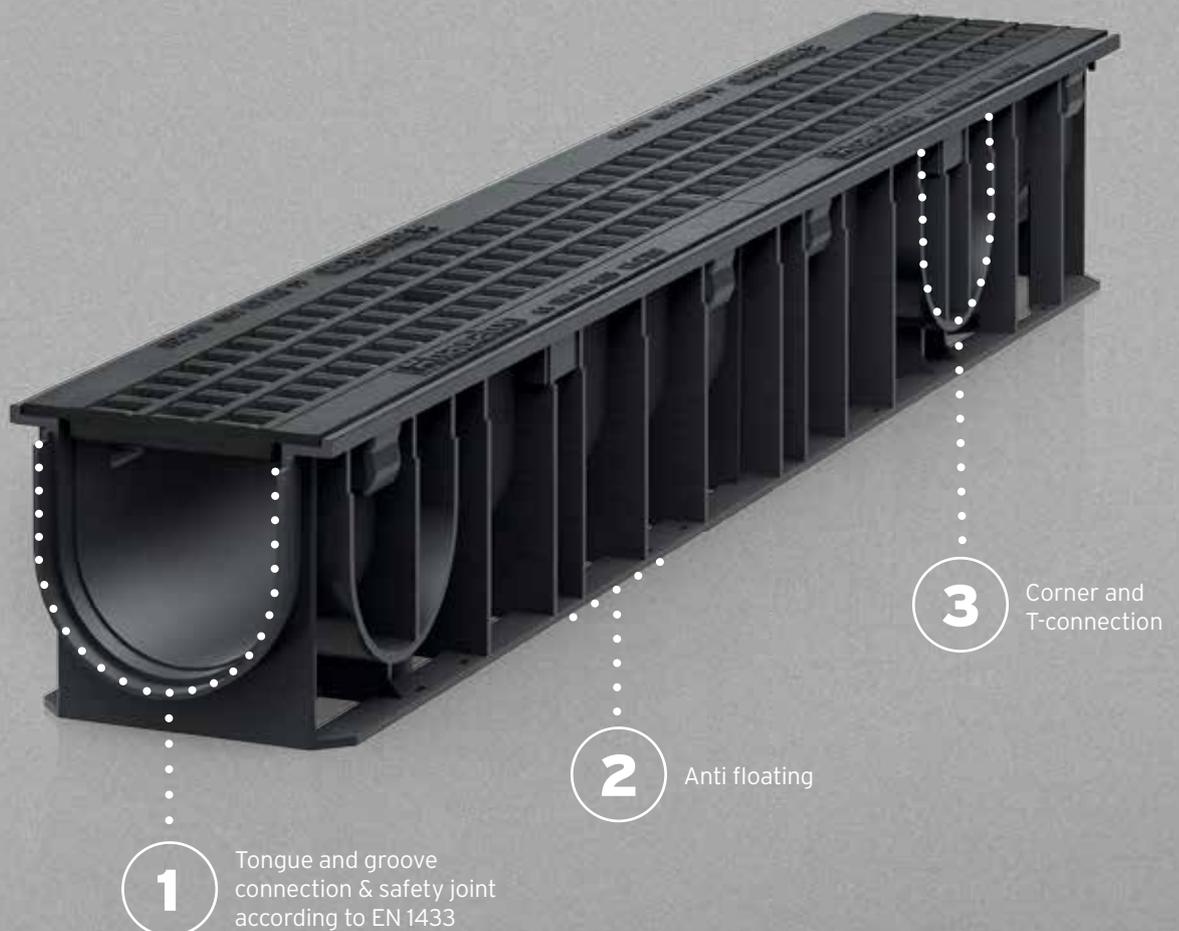

- high resistance against frost, de-icing salt and UV-rays
- withstands high temperature differences
- for climate ranges from - 50 °C to + 80 °C and more

**= QUALITY ASSURED / LONGEVITY**

**IDEAL FOR ...**

domestic applications around the house and garden, such as predominantly private areas, driveways, courtyards, gardens and parks.

**The Original**

# RECYFIX® STANDARD

Drainage channel for domestic applications around the house and garden.

RECYFIX STANDARD channels meet the requirements of DIN EN 1433 and are suitable for the following load categories:

### Category A 15, Load class 15 KN

Trafficked areas, which are exclusively used by pedestrians and cyclists

### Category B 125, Load class 125 kN

Sidewalks, pedestrian areas and comparable areas, car parks or car parking decks

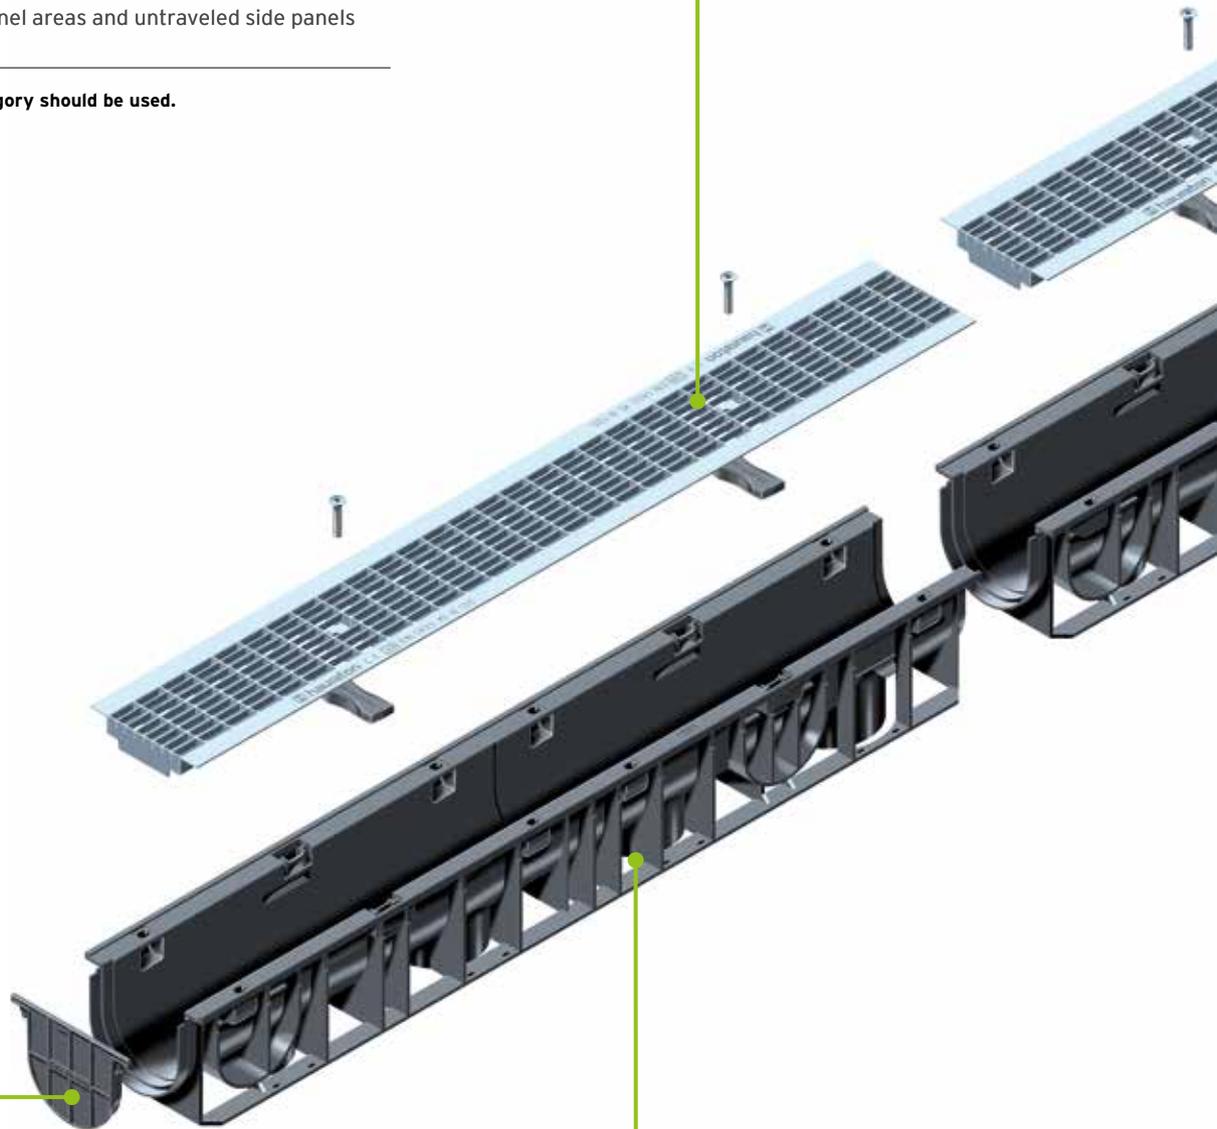

### Category C 250, Load class 250 KN

Sidewalk channel areas and untraveled side panels or similar

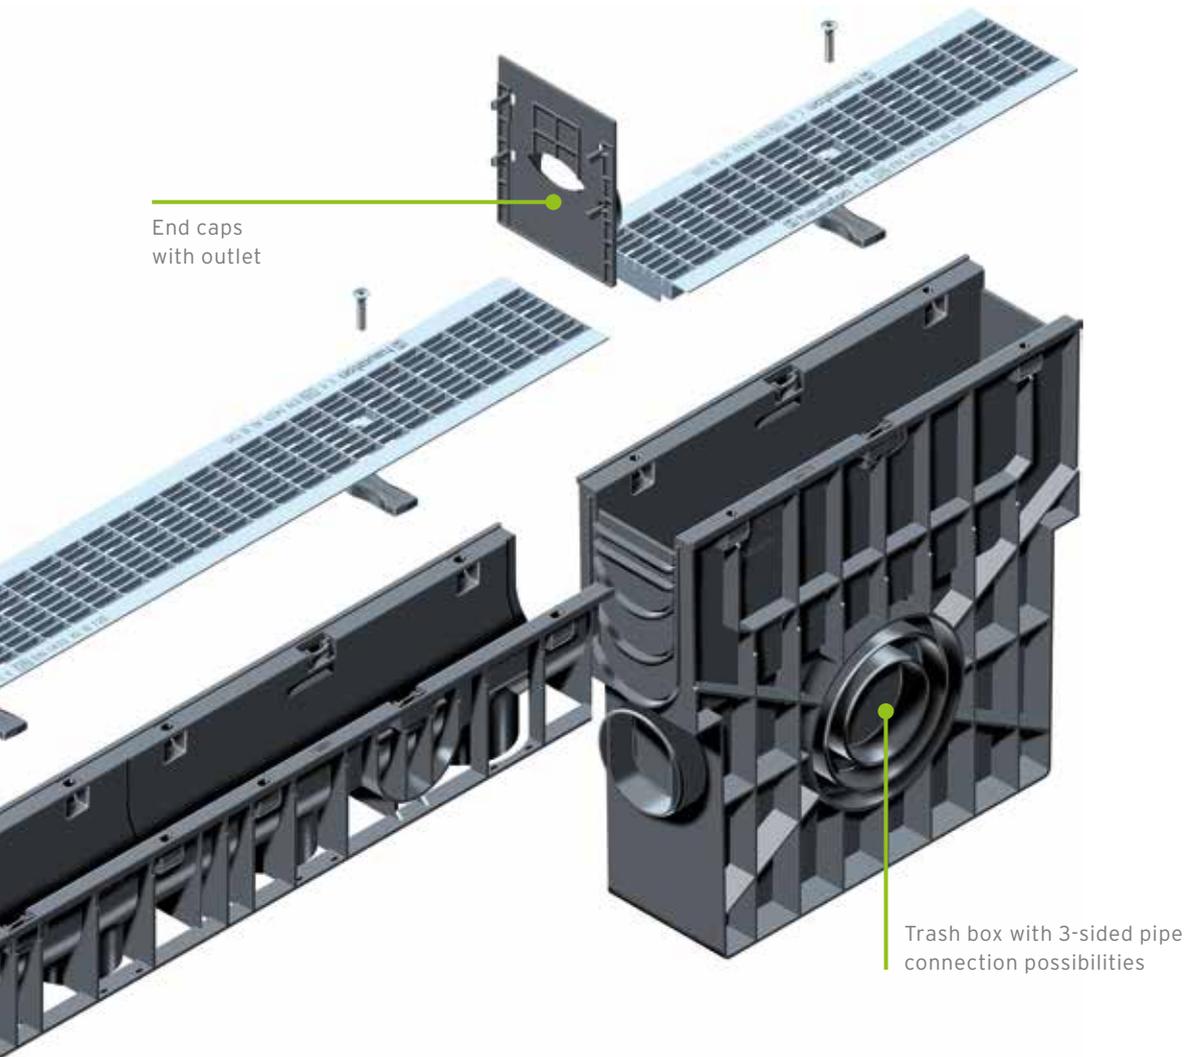

If in doubt, the higher category should be used.

Numerous grating options, for example GUGI-Ductile iron mesh gratings

End caps without outlet

Channels made of PP, according to DIN V 19580 / EN 1433, CE-conform, with tongue and groove connection for exact installation

# Facade Drainage

Reliable water retention system for terraces, facades and flat roofs.

# Facade Drainage

Reliable water retention system for terraces, facades and flat roofs.

## 1 Requirements

- fast and reliable removal of surface water on facades, flat roofs and terraces
- compliance with the guidelines and the flat roof relevant DIN standards
- backwater reserve for sudden accumulation of rainwater

## 2 Application areas

- flat roof green areas
- passable roof areas and terraces
- facade channels
- in front of entrances of balconies and terraces

## 3 Solutions

- powerful backwater reserve for abruptly accumulated water quantities
- horizontal and vertical drainage
- effective protection of walls, doors and windows elements
- open channel systems: channel bodies have drainage possibility on all sides
- barrier-free transitions on terraces
- easy assembling kit

# YOUR BENEFITS WITH **DACHFIX®RESIST**

## INDIVIDUAL SOLUTIONS

- guidelines for the preparation of corner pieces
- optional height adjustment
- double ribs for the preparation of full 0.5 m pieces
- big length for efficient installation

### = FLEXIBILITY

## VARIOUS GRATING OPTIONS

- variety of materials: PP, galvanised steel, stainless steel

### = FLEXIBILITY

## DURABILITY & HIGH RESISTANCE

- high resistance against frost, de-icing salt and waterlogging
- **DACHFIX®** channels withstand all weather influences
- permanently corrosion-resistant (**DACHFIX®RESIST**)

### = QUALITY ASSURED

## QUICK INSTALLATION

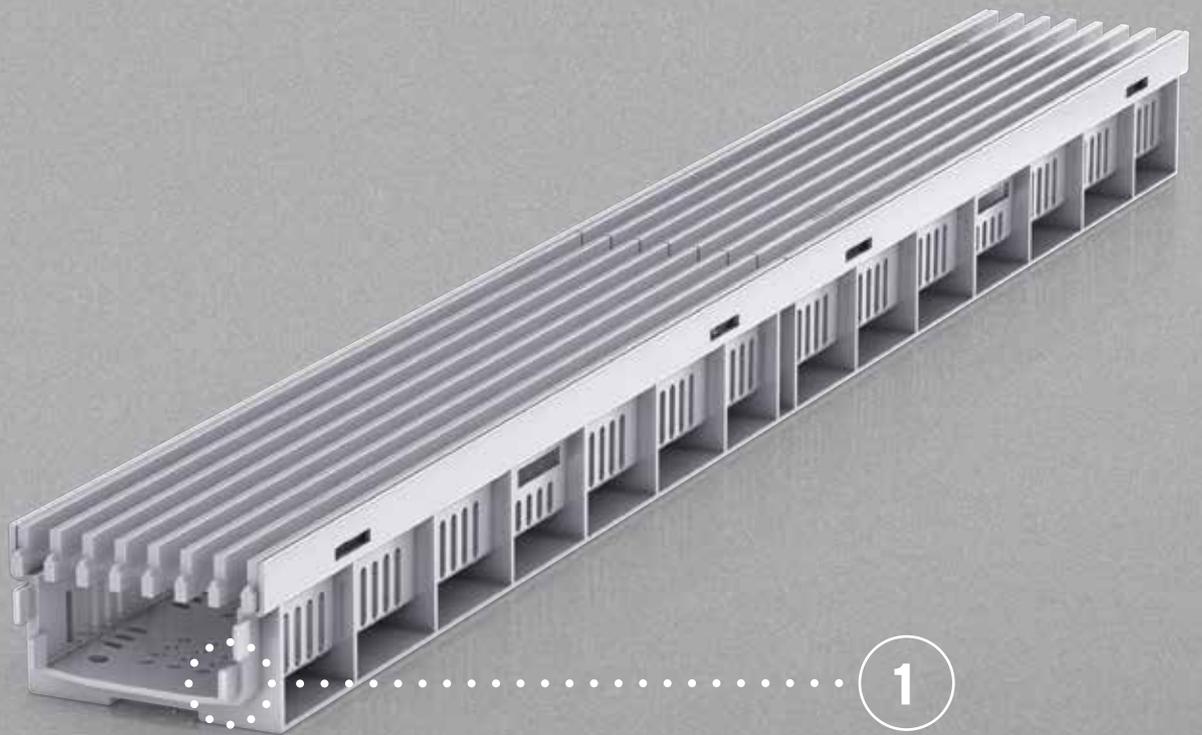

- easy to handle
- tongue and groove system for straight installation

### = COST SAVINGS

**IDEAL FOR ...**

facades and flat roofs. The channels permanently protect buildings from standing or pressurised water.

Tongue and groove system

**Option for 100 % corrosion-free**

# DACHFIX® RESIST

Reliable water retention system for terraces, facades and flat roofs.

## Modern residential development featuring corrosion-free and durable DACHFIX® drainage system

### Durable and corrosion-free:

Facade and terrace drainage with DACHFIX RESIST. In Sindelfingen in Swabia, a new state-of-the-art project is being developed in a central location. The idea is that the development, with its 40 residential units ranging from exclusive penthouses to owner-occupied apartments, terraced and semi-detached houses through to sheltered housing for the elderly, will provide housing for a mix of age-groups living together. In line with the high-quality interior specification and the attractive architectural design, all materials - including those for the facade and terrace drainage - are reliable and durable.

### DACHFIX® RESIST features:

- channels and gratings made of high-quality PP - 100% corrosion-free
- long service life even under permanently wet conditions on roof terraces
- PP longitudinal grating in an attractive and elegant silver-grey design
- very suitable for contact with bare feet at terrace doors
- highly reduced installation costs due to easy installation and low weight

**Housing estate in Sindelfingen,  
Germany**

# DACHFIX® STEEL Channels

For standard facade drainage.

## Facade drainage

The HAURATON DACHFIX channel range covers all installation situations with the best solutions. Moisture should never be allowed into a building through external areas such as doors and facades. HAURATON products ensure the protection. The channels meet all relevant regulations for facade drainage and provide the following benefits:

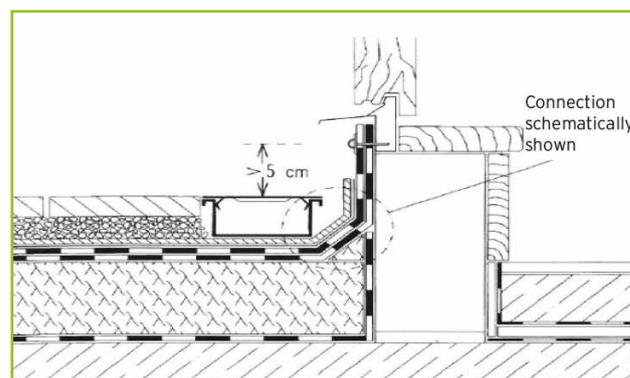

- large volumes of rainwater drained quickly and safely
- backflow reserve for sudden heavy rainfall
- avoidance of puddles forming around facade
- indoor areas safeguarded from heavy rainfall

Channels should not be lifted by strong winds and must prevent surface ponding. In many regions also snow, ice and slush require handling efficiently. Heat permeating through doorways can quickly melt snow and ice, creating high volumes of surface water. This may be contained by remaining snow and ice. The DACHFIX range of facade drainage meets all these challenges and more, providing continuous and efficient surface drainage. Correct channel sizing to accommodate for anticipated surface water volumes is provided through comprehensive technical support available from HAURATON.

High architectural standards are maintained through a wide variety of grating designs and combinations: in both galvanised and stainless steel.

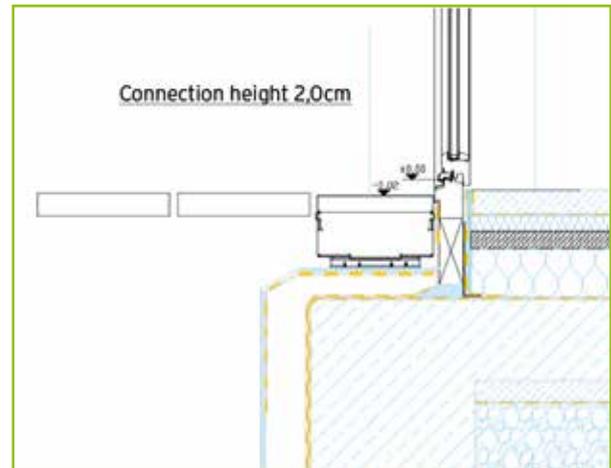

## Well-known practical requirements

Height differences from 15 to 0 cm are familiar in the area of building drainage. Without a drainage system a level difference of 15 cm is required. This can be reduced to 5 cm with the use of DACHFIX STEEL. For safety reasons, many buildings are planned with a 5-cm level difference between indoor areas and water-bearing levels. However, this means that these buildings are not barrier-free accessible.

## Practical requirements for barrier-free entrances

In practice, a 2 cm-high threshold is often accepted as barrier-free. However, in many public buildings a totally level surface (zero level) is used for handicapped-accessible and barrier-free access. To achieve this, entrances, exits and adjacent surfaces must be precisely constructed with no height differences. DACHFIX STEEL channels can meet both installation scenarios.

## Accessibility

Barrier-free entrance: Through precise height adjustment to the floor, DACHFIX STEEL can be fully adapted to suit any environment. HAURATON meets the regulations, high standards and expectations of architects and planners regarding design of barrier-free buildings.

# DACHFIX® STEEL Channels

The right channel for every installation situation.

## Typical on-site installation examples

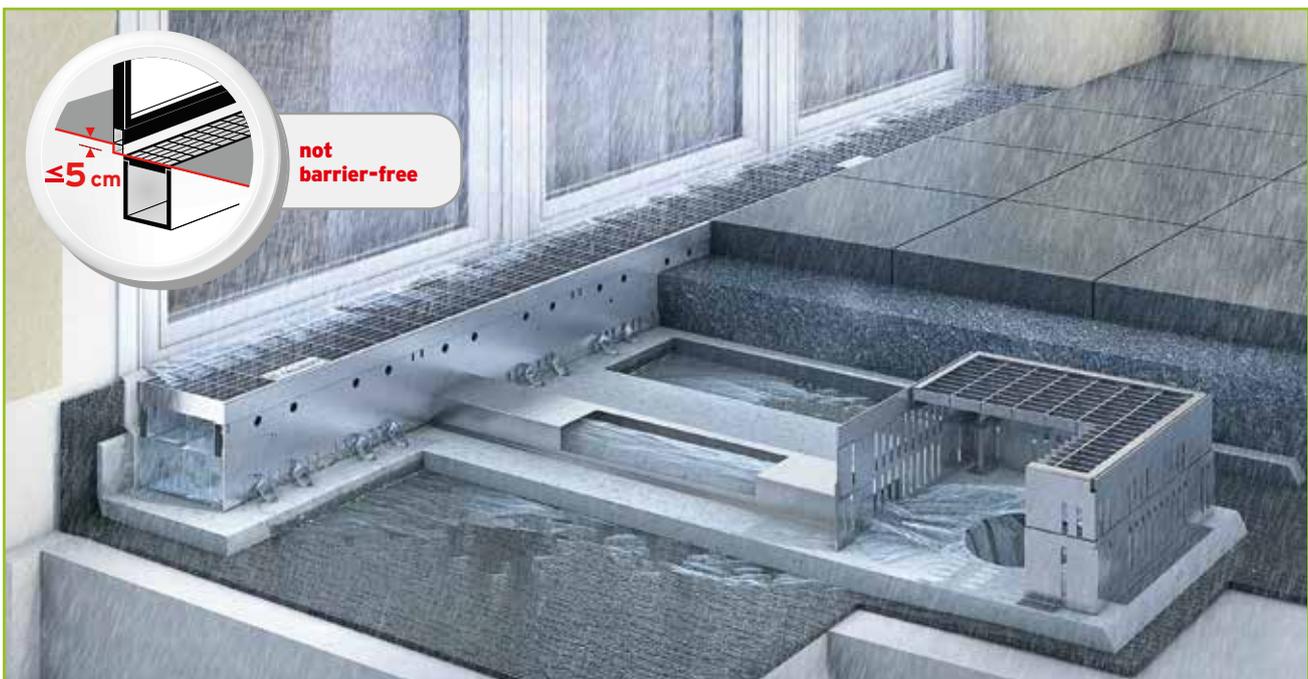

The DACHFIX STEEL channel range covers all standard installation situations and provides the best solution for every purpose.

## Important for all installation situations: special attention to height level

If the channels are not connected to the wastewater pipe (installation situations A + B), a level difference of 5 cm between indoor areas and water-bearing levels should be observed. These buildings are not barrier-free accessible. In order to make entrances with a 2-cm difference in level or barrier-free (0 cm), a direct connection to the wastewater drainage system ensures reliable drainage (see installation situations C - E).

## Installation situation A - Drainage via cross-intersection channel and DACHFIX®POINT

- Minimal overall construction, eg. roof terraces (no permeability).
- Drainage of water over a damp-proof-membrane through DACHFIX POINT.
- DACHFIX STEEL channel is connected to DACHFIX POINT via the cross-intersection channel. This ensures continuous drainage even when the roof structure is obstructed by fine particles and infiltration is reduced.

**Installation situation B - Drainage without pipe connection to channel, 5 cm threshold**

- Solution for reveal area with exit threshold.
- Channels installed with permeable concrete.
- Channels are perforated without pipe connection.  
The water percolates underground.

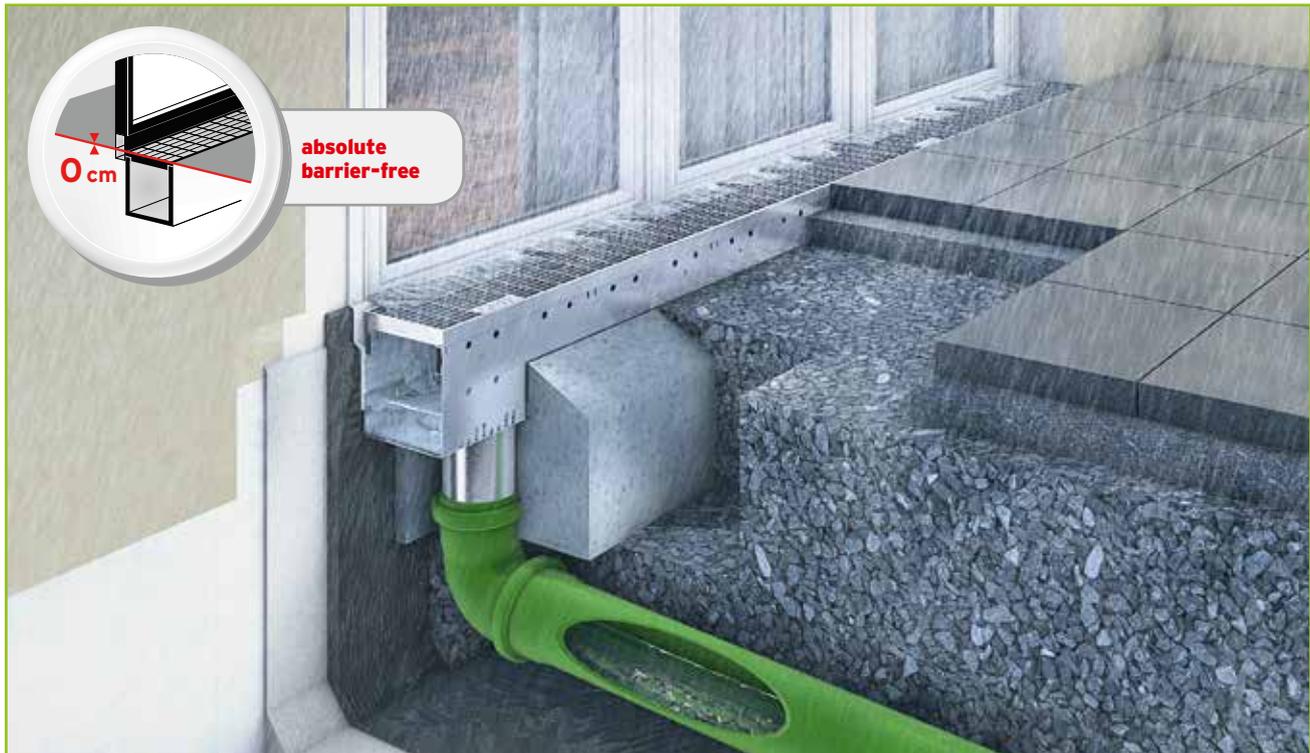

# DACHFIX® STEEL Channels

The right channel for every installation situation.

## Installation situation C - Drainage via channel with vertical pipe connection, level entrance (0 cm)

- Solution for reveal area without substructure.
- Channels are perforated. Some of the water is percolated underground.
- Channels installed with permeable concrete.
- Direct connection of channel to wastewater drainage system.

### Installation situations D + E - Drainage via drain box, horizontal & vertical connection

- Solutions for a connection at the substructure reveal area with minimal overall construction.
- Channels are perforated. Some of the water percolates underground.
- Channels installed with permeable concrete.
- Direct connection of DACHFIX drain box to wastewater drainage system.

# DACHFIX® STEEL Channels

The right channel for every installation situation.

## Always the right channel for every installation application

DACHFIX STEEL channels were specifically developed for all practical installation applications. A wide range, with 5 widths each in 4 heights, covers project requirements and provides reliable drainage and effective splash-water protection in every case.

- 5 widths (115, 135, 155, 205, 255 mm) each in 4 heights (45, 75, 100, 150 mm)
- the right channel for every application
- large channel widths to capture splash water
- solution for reveal area without substructure
- perforations in channel base for percolation of subsurface water
- channels installed with permeable concrete
- wastewater pipe connection direct to channel
- channels are perforated and connected to DACHFIX drain box via vertical connection

The scope of design is created by the wide range of different grating options.

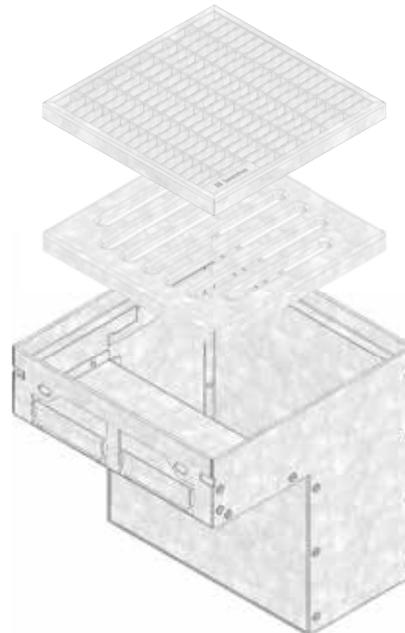

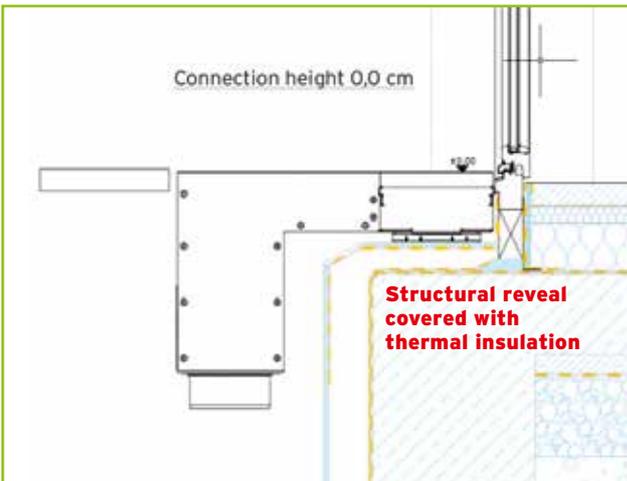

Whether a slotted, mesh, perforated or longitudinal grating - the product range always provides the right solution.

### Unique: The DACHFIX® drain box

Reveals are provided with thermal insulation and therefore require drainage channels with shallow inverts. In this case there is no possibility for a positive pipe connection (vertical or horizontal).

The DACHFIX drain box sits on top of the protruding insulation board to provide positive connection to the channel and carry water to a discharge point beyond the structure; with the option for vertical or horizontal pipe connection at least 15 cm lower than the channel invert.

- allows a vertical or horizontal connection with substructure areas (reveal, thermal insulation)
- can be installed with 25 x 25 cm standard tiles without being cut
- 2 drain box designs are compatible with all DACHFIX STEEL channels
- matching gratings provide uniform appearance with DACHFIX STEEL channels

# DACHFIX® STEEL Channels

## Application areas for DACHFIX® STEEL Channels.

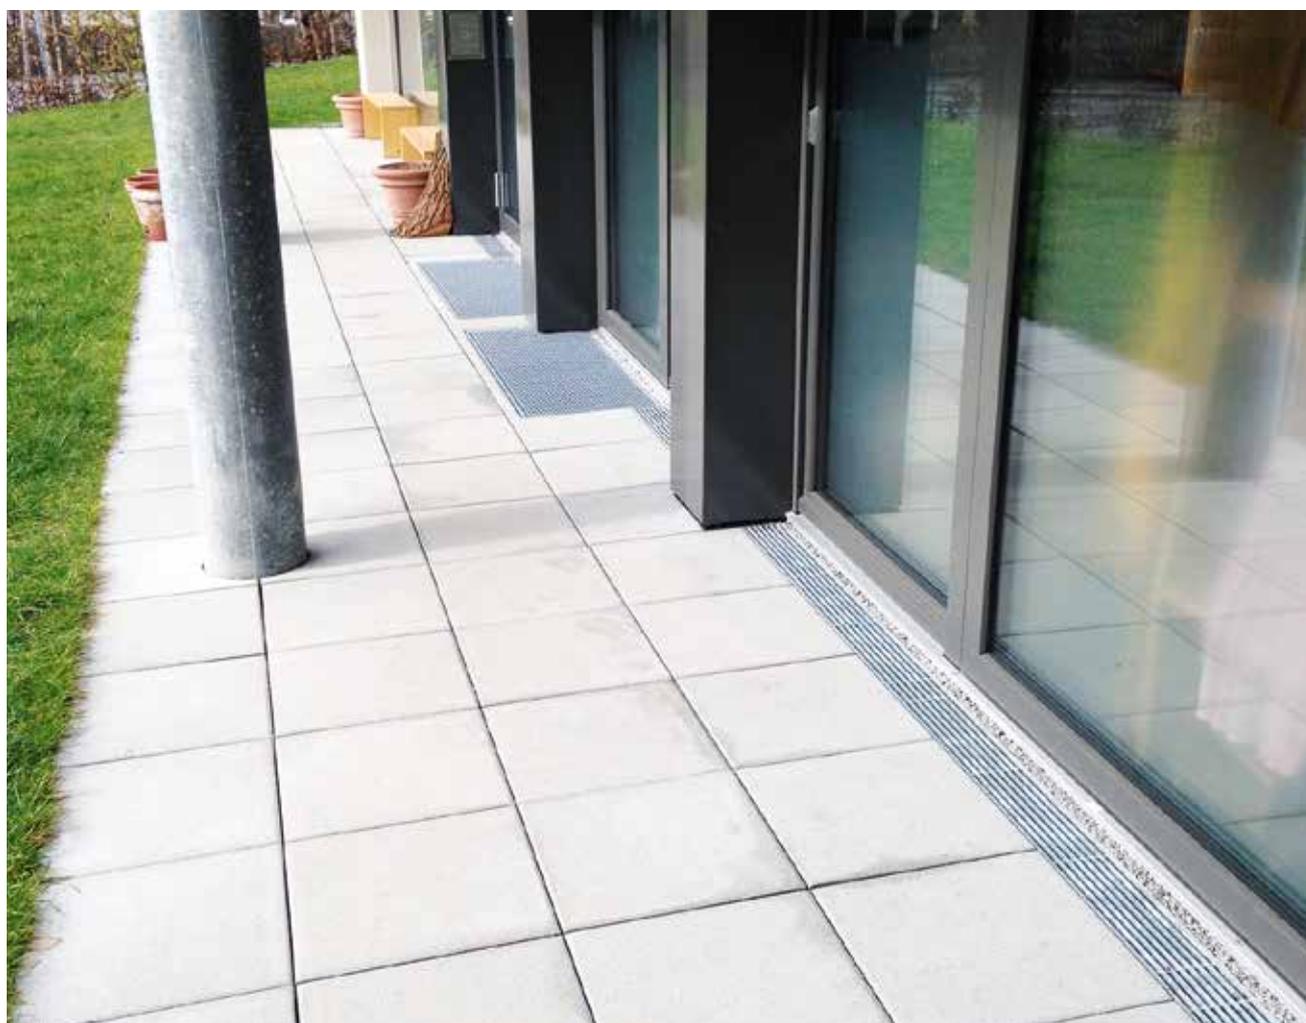

### Security in planning and implementation

DACHFIX STEEL channels are especially developed for reliable and safe drainage of facades and flat roofs. The channels permanently protect buildings from standing or pressurised water while enabling entrances and passages to be made accessible.

- wide variety of channels with different widths and heights
- cover all standard installation situations
- implementation in accordance with standards and guidelines
- wide range of gratings for design flexibility
- hydraulic calculation provided by HAURATON Project Management Team

### Application areas

- facades
- roof terraces
- flat roofs
- floor areas
- substructured reveal areas

facades and flat roofs. The channels permanently protect buildings from standing or pressurised water.

Innovative perforation  
for simple on-site connection

# DACHFIX® STEEL Channels

Reliable backwater reserve for terraces, facades and flat roofs.

DACHFIX Channels are suitable for pedestrian traffic and wheelchair access.

## New drainage system

The new DACHFIX STEEL channel range includes many practical details that makes this system unique. Installation and processing are more simple and guarantee success.

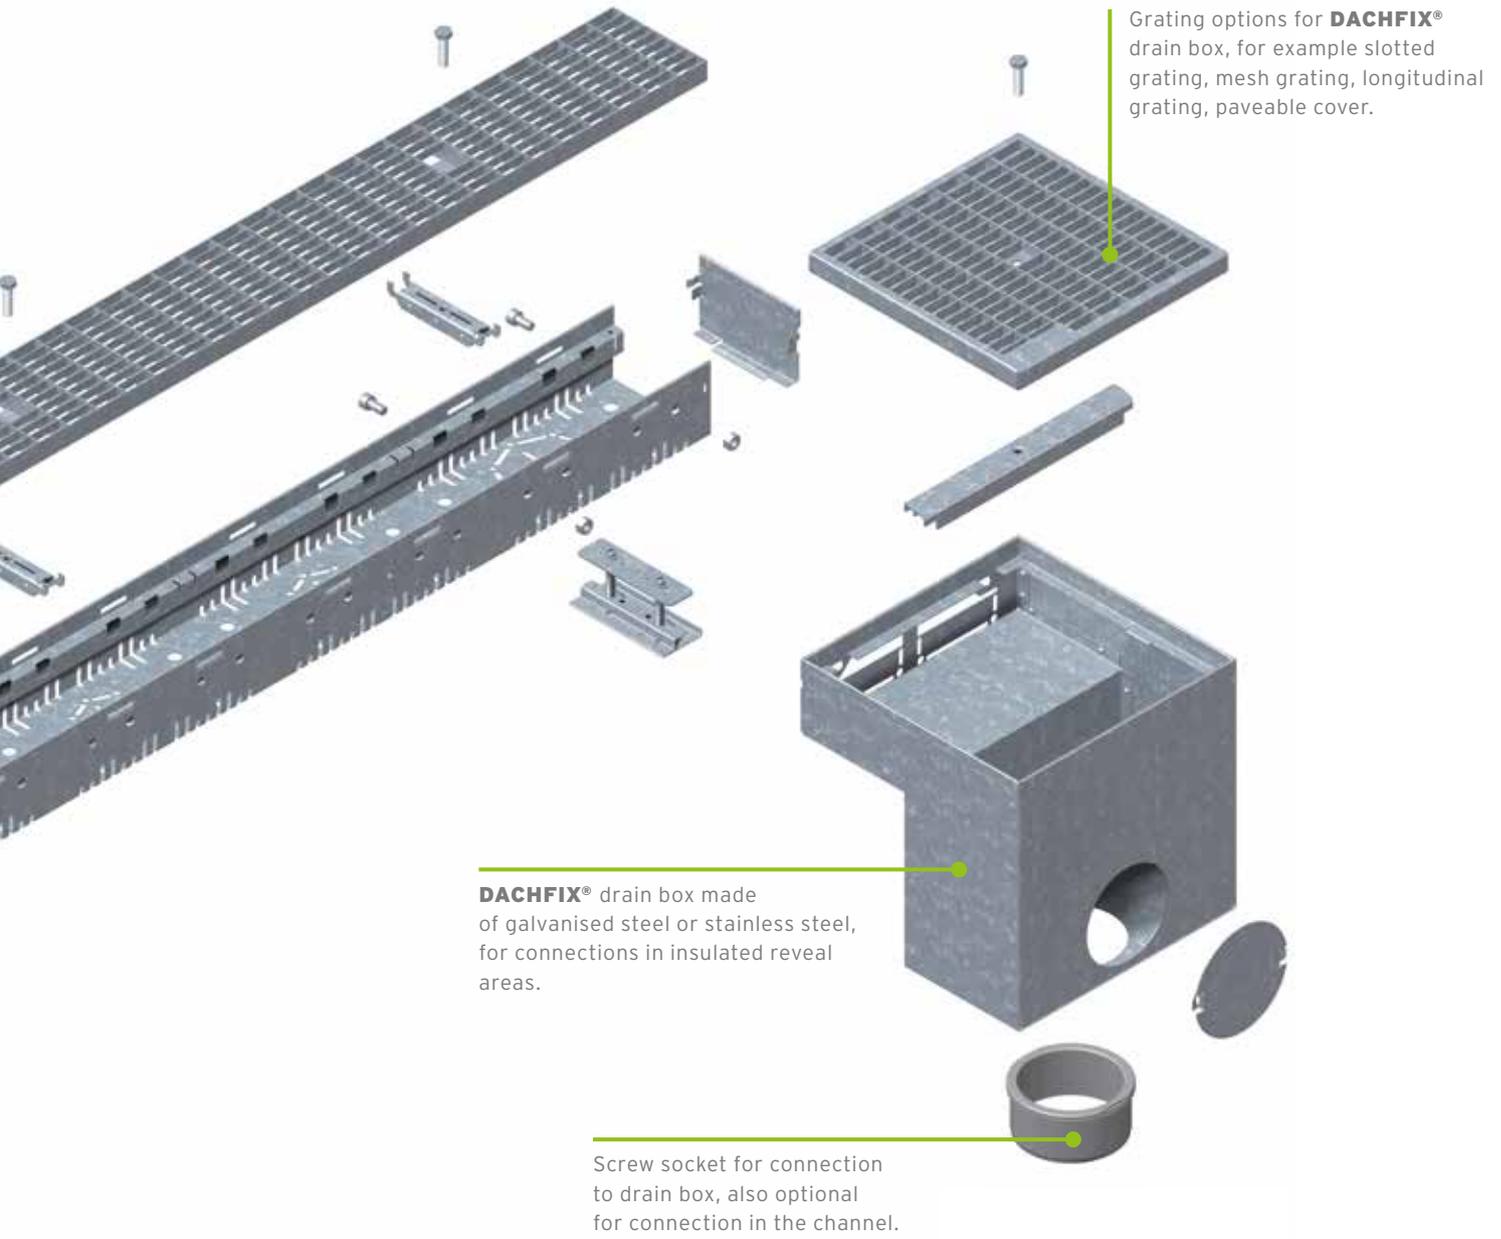

Various grating options, for example mesh grating, slotted grating, perforated grating and longitudinal grating, available in these materials; recycled composite, galvanised steel, stainless steel.

Locking system for easy connection of channel unit or optional screw fastening of grating, retrofittable at any time.

Channel made of galvanised steel or stainless steel, in different widths and heights with pre-perforated punch outs DN 70 and DN 100 for optimal connection possibility.

Optional height adjustment for all widths and heights.

End cap for channel opening and end with clip-function for secure locking.

Grating options for **DACHFIX®** drain box, for example slotted grating, mesh grating, longitudinal grating, paveable cover.

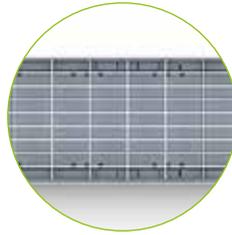

**DACHFIX®** drain box made of galvanised steel or stainless steel, for connections in insulated reveal areas.

Screw socket for connection to drain box, also optional for connection in the channel.

# SLOTTED CHANNELS

SLOTTED CHANNELS for design-sensitive applications.

**Killesberghöhe in Stuttgart,  
Germany**

# SLOTTED CHANNELS

SLOTTED CHANNELS for design-sensitive applications.

## 1 Requirements

For the drainage of areas with architectural demands

- the surface drainage has to be discreetly hidden
- processing of all standard surface layers and stone slabs should be possible
- the surface water needs to be drained reliably

## 2 Application areas

- for areas and facades with high optical demands
- especially in public and commercial areas

## 3 Solutions

Therefore SLOTTED CHANNELS are suitable for the drainage of areas with architectural demands:

- only with the visible slot (narrow line) on the surface the clear elegance and significance is reached
- for all common surface layers and even asphalt
- allows to design a project in an uniform design
- functional requirements are completely met
- easy access to channel run through access cover
- slotted gratings made of galvanised or stainless steel

# YOUR BENEFITS WITH SLOTTED CHANNELS

## INDIVIDUAL SOLUTIONS

- slotted covers made of: galvanised or stainless steel
- individual slotted covers with modified neck height, crossbars in the slot and more designs possible
- possibility to create a project in uniform design

= **DESIGN FLEXIBILITY / EXCLUSIVENESS**

## ATTRACTIVE PRODUCT

- perfectly designed drainage line blends harmoniously into the appearance of the site

= **UNIQUENESS**

## TECHNICAL FEATURES OF THE COVERS

- reinforcements under the cover and material thickness provide perfect balance between weight and stability
- class D 400 material thickness 4 mm
- slotted covers are riveted → no rusting of welded joints
- especially stable
- surface water is drained reliably

= **LONGEVITY**

## HIGH-LEVEL FUNCTIONALITY AND EASY INSTALLATION

- quick access to channel run through removable access cover
- easy handling and installation

= **TIME & COST SAVINGS**

## CONNECTION POSSIBILITIES

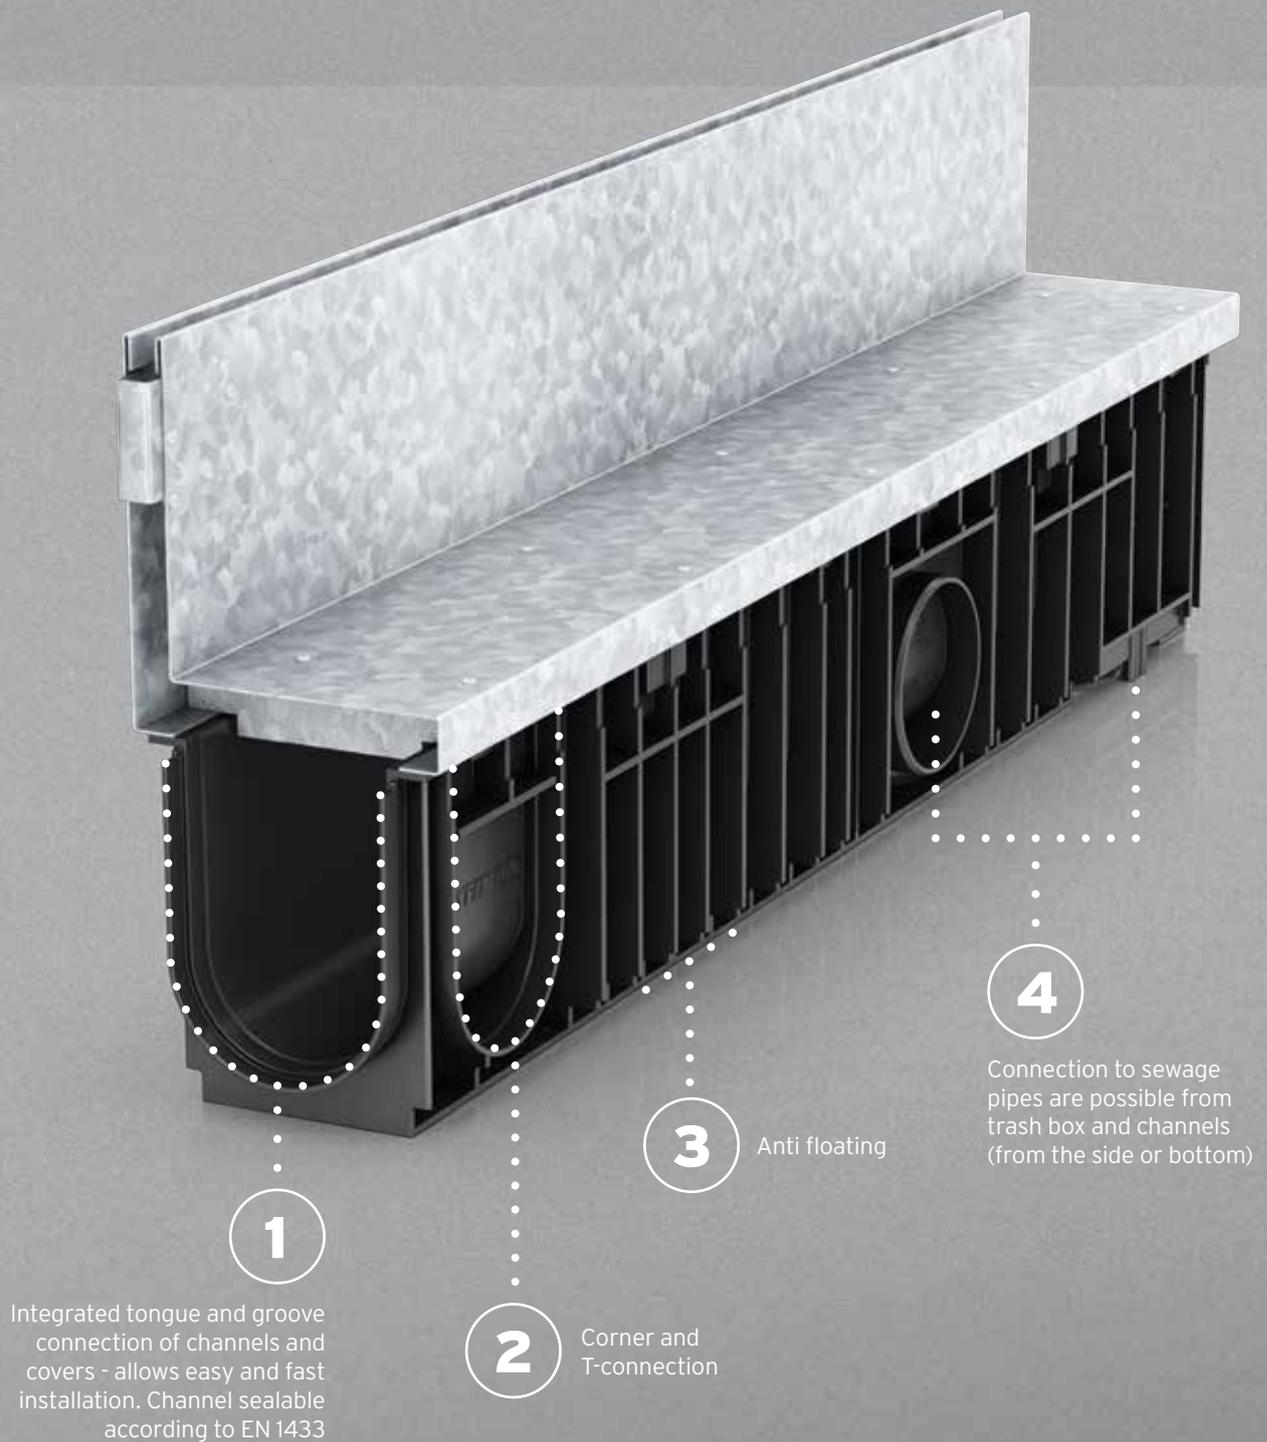

- access covers fit on both channels and trash boxes
- easy preparation of corner connections possible
- pivable access cover
- processing of all standard surface layers and stone slabs possible

= **DESIGN FLEXIBILITY**

**IDEAL FOR ...**

design-sensitive applications, such as areas and facades with high optical demands especially in public and commercial areas.

# SLOTTED CHANNELS

SLOTTED CHANNELS for design-sensitive applications.

**World champion surface drainage for German football.**

## FASERFIX® SLOTTED CHANNELS

**DFB Football Museum in Dortmund with a modern drainage system.** The impressive architecture shows that the theme of football is given a central place with this museum in the urban backdrop of Dortmund. The overall architectural concept of the architects of HPP Hentrich-Petschnigg & Partner placed high demands on the individual components in advance, also for the drainage technology installed. For this area, slotted channels were planned from the very beginning. Running underground, they integrate themselves into the overall visual impression.

## The efficiency of this channel:

- FASERFIX STANDARD 150 Channels: stable and secure
- Slotted Cover:
  - Class D 400: ideally suited for high traffic loads
  - Material: galvanised steel
  - Optics blend harmoniously into the appearance of the area
- Trash boxes with visually unobtrusive inspection chambers for access to the channel run

**DFB Football Museum  
in Dortmund, Germany**

# SLOTTED CHANNELS

SLOTTED CHANNELS for design-sensitive applications.

SLOTTED CHANNELS meet the requirements of DIN EN 1433 and are suitable for the following load categories:

## Category A 15, Load class 15 kN

Trafficked areas, which are exclusively used by pedestrians and cyclists

## Category B 125, Load class 125 kN

Sidewalks, pedestrian areas and comparable areas, car parks or car parking decks

## Category C 250, Load class 250 kN

Sidewalk channel areas and untraveled side panels or similar

## Category D 400, Load class 400 kN

Carriageways of roads (including pedestrian streets), sideways of roads and parking areas that are passable for all types of road vehicles.

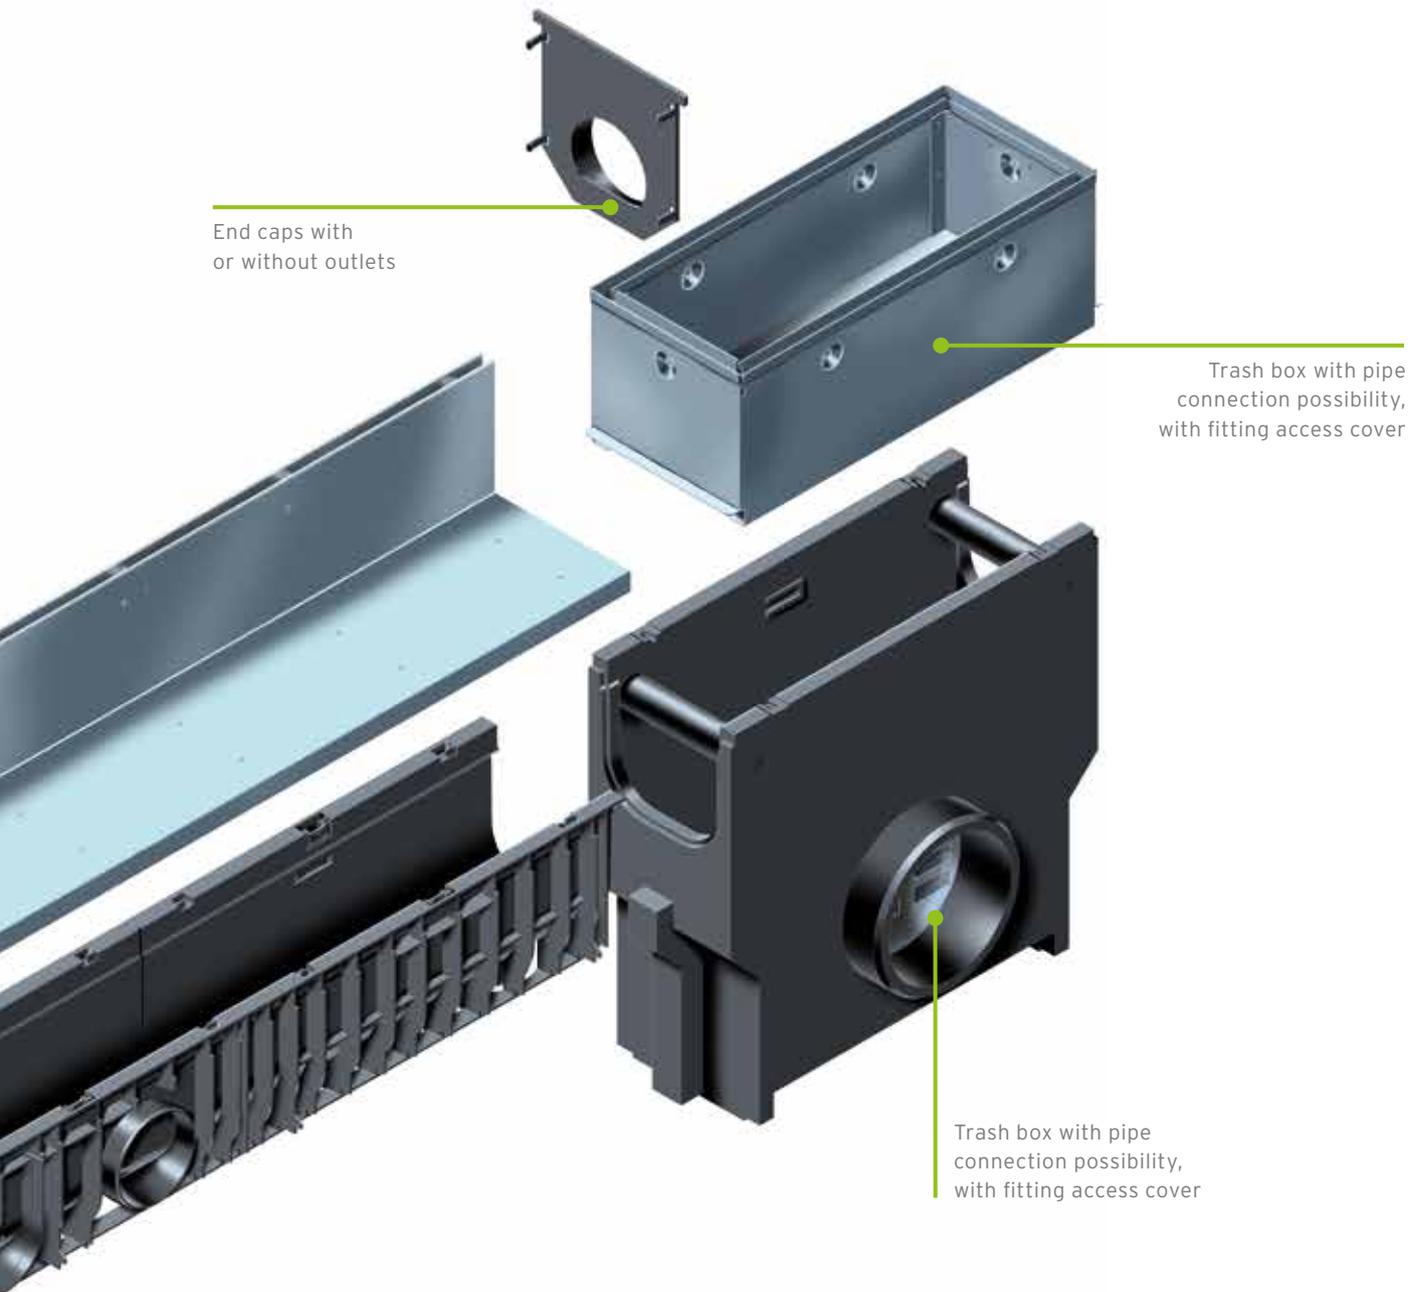

If in doubt, the higher category should be used.

Symmetrical or asymmetrical covers made of galvanised or stainless steel

End caps with or without outlets

Channels made of PP or fibre-reinforced concrete in nominal sizes 100 and 150, with tongue and groove connection for exact installation

# YOUR BENEFITS WITH SLOTTED CHANNELS FLAT

## PRODUCT RANGE

- monolithic slotted channel with flat channel body
- ideally suited for low installation heights
- two different neck heights for standard slab/paving thicknesses

**= FLEXIBILITY / COST SAVINGS**

## CLOSED OR PERFORATED CHANNEL BODY

- variable versions according to requirements
- as closed or perforated version for surface water drainage or for onsite infiltration

**= FLEXIBILITY**

## CORNER ELEMENT

- 90 ° inner and outer corner available
- can be used at any point on the channel run, even when shortening the channel elements

**= FLEXIBILITY / COST SAVINGS**

## CONNECTOR

- guaranteed flush-mounted installation
- secures the channel against displacement
- can be used at any point on the channel run, also when shortening the channel elements

**= PERFORMANCE ASSURED / FLEXIBILITY**

## END CAP

- unique end cap
- no penetration of foundation material
- permanently fixed via clip function

**= COST SAVINGS**

## INSPECTION BOX

- serves for cleaning and maintenance of the channel run
- enables vertical connection to the drainage pipe
- removable cover can be filled with the surrounding surface coating
- homogeneous appearance
- can be placed variably in the channel run, also on shortened channel elements
- slot continues to run seamlessly

**= QUALITY & PERFORMANCE ASSURED**

## SLUDGE TRAP INLAY FOR CHANNEL SLOT

- keeps away coarse dirt
- reduces the slot width for pedestrian areas
- can be retrofitted if required
- clippable

**= QUALITY & PERFORMANCE ASSURED**

## MATERIAL

- galvanised or stainless steel
- can be selected according to requirements

**= FLEXIBILITY / LONGEVITY**

**IDEAL FOR ...**

spaces and surfaces with high aesthetic demands, in particular flat installation situations.

**1**

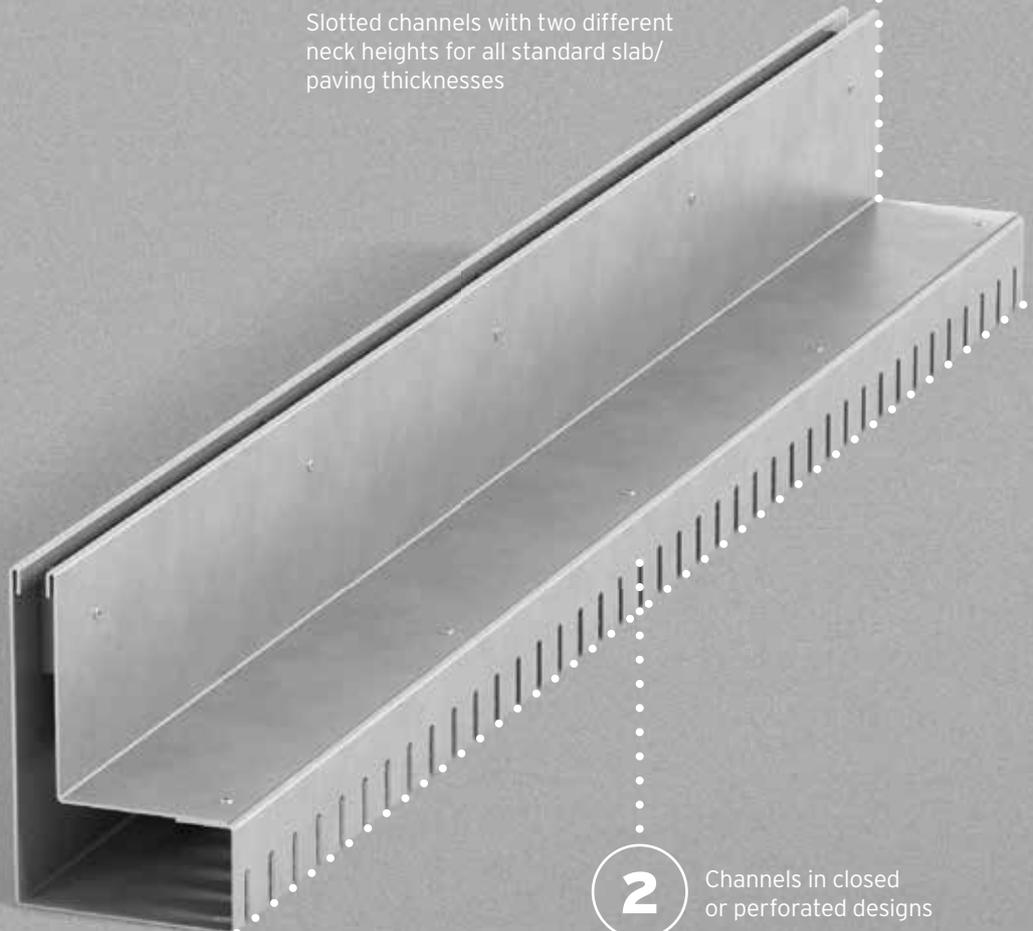

Slotted channels with two different neck heights for all standard slab/paving thicknesses

**2**

Channels in closed or perforated designs

**3**

Flat channel body with two different neck heights

# RECYFIX® POINT FASERFIX® POINT STANDARD

Point drainage for yards, garages and patios.

# RECYFIX® POINT FASERFIX® POINT STANDARD

Point drainage for yards, garages and patios.

## 1 Requirements

- discharge of heavy rain or or large melting water quantities at one point
- the system has to permanently withstand all expected traffic loads
- the point drainage gullies can be integrated harmoniously in the surface

## 2 Application areas

- courts
- garage forecourts
- places and parking areas
- ways

## 3 Solutions

- high stability due to materials used: polypropylene or fibre-reinforced concrete
- low weight (RECYFIX POINT) for easy transport and installation
- connection possibilities to every kind of sewage pipe
- high quality ductile iron gratings in star design and galvanised mesh gratings
- mud bucket as well as baffle as foul air trap included

# RECYFIX® GREEN

Turf honeycomb for infiltration of rainwater in parking areas.

# RECYFIX®GREEN

Turf honeycomb for infiltration of rainwater in parking areas.

## 1 Requirements

- preserve natural seepage areas during the progressive sealing of land or create new ones
- high drainage capacity and stability at the same time - depending on the exposure to traffic
- passable even for large vehicles loads, such as HGVs, coaches or agricultural vehicles
- possible application of mineral-based fill materials, such as chipping

## 2 Application areas

- occasionally frequented parking areas
- exhibition areas
- parking lots for passenger cars
- pedestrian pathways
- holiday resorts
- reinforcements for embankments and river banks

### RECYFIX®GREEN SUPER

- camping places
- trailer home parks
- driveways on golf courses
- access ways for fire fighting vehicles and rescue vehicles

### RECYFIX®GREEN STANDARD

- terraces
- urban green spaces around trees
- lawns and pathways in sports grounds

## 3 Solutions

- 100% recycled material with very high flexibility
- stable and breakproof
- extremely lightweight and hence easy to transport and lay
- integrated anchors and mutual latching keep the blocks together
- can be additionally fastened with anchoring pegs
- weather-resistant and durable

## 4 Versions

### RECYFIX®GREEN SUPER

- massive construction for higher dynamic load
- different materials (gravel, chippings, stone, earth, turf) can be used for filling

### RECYFIX®GREEN STANDARD

- for parking areas with low dynamic loads
- turf planted areas
- protection against erosion, stable turf

# RECYFIX® GREEN SUPER

## Safely anchored to the ground

RECYFIX GREEN SUPER blocks are equipped with integral anchors that ensure safe positioning on the ground. Where the blocks are laid on sloping ground or embankments, additional anchoring is possible with Anchoring Pegs.

## Technical data

### ■ RECYFIX GREEN SUPER

Material: 100 % industrial recycled PE,  
highly impact-resistant, UV-stabilised,  
Colour: black

The recycling process may result in variations in colour.

Openings for root penetration: > 50 %

Load-bearing capacity:

tested distributed load when installed: max. 4,000 kN/m<sup>2</sup>

Dimensions: L 600 x W 400 x H 75 mm

Coverage: approx. 4 blocks per m<sup>2</sup>, including joints

Weight: approx. 2.5 kg/block      Item No.: 40060

### ■ RECYFIX Anchoring Pegs

for additional anchoring on sloping ground

Material: 100 % pure recycled ABS-plastic,  
highly impact-resistant

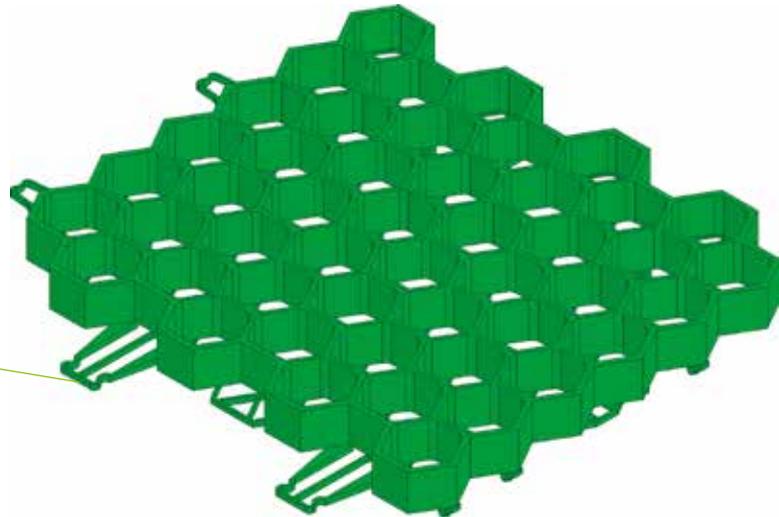

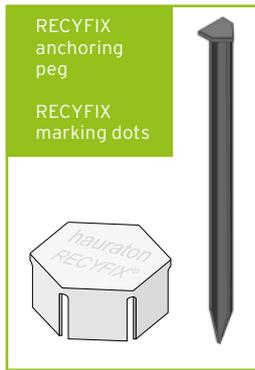

Colour: black

Length: 250 mm

Weight: approx. 20 g/peg

Item No.: 40020

# RECYFIX® GREEN STANDARD

## Technical data

### ■ RECYFIX GREEN STANDARD

Material: 100 % pure recycled HD-PE,  
highly impact-resistant, UV-stabilised

Colour: green

The recycling process may result in variations in colour.

Openings for root penetration: over 50 %

Size 1 dimensions: approx. 387 mm x 334 mm x 38 mm

Coverage: approx. 5.9 mats per m<sup>2</sup>

installation with fixed expansion joint (to compensate  
for longitudinal expansion)

Weight: approx. 610 g/piece                      Item No.: 40000

Size 2 dimensions: approx. 387 mm x 555 mm x 38 mm

coverage: approx. 3.8 mats per m<sup>2</sup>

installation with fixed expansion joint (to compensate  
for longitudinal expansion)

Weight: approx. 1000 g/piece                      Item No.: 40005

### RECYFIX® Marking Dots

to provide a visual demarcation between parking lots etc.

Material: 100 % HD-PE,

highly impact-resistant, UV-stabilised

Colour: white

Height: 38 mm

Weight: approx. 20 g/piece

Item No.: 40015

### RECYFIX® Anchoring Pegs

for additional anchoring on sloping ground

Material: 100 % unmixed recycled ABS-plastic,  
highly impact-resistant

Colour: black

Length: 250 mm

Weight: approx. 20 g/piece

Item No.: 40020

# LINEFIX®

Effective border edging for garden and park areas.

# LINEFIX®

Effective border edging for garden and park areas.

## 1 Requirements

- effective and visually unobtrusive edging for pathways, flowerbeds and lawn areas
- adapt to the shapes of pathways and borders
- barrier against root spread at transitional areas, such as between lawn and paved areas or lawn and tamped areas

## 2 Application areas

- pathways
- squares
- lawn
- sport grounds

## 3 Solutions

- easy to install, without digging a trench and foundations
- can be installed much easier than concrete edgings
- visually unobtrusive and yet very effective edging
- can be installed in straight lines or in curves and bends
- can be made in different materials: PP, galvanised steel or stainless steel
- different radii, also close to borders 1 m radius

TOP X

# TOP X

The drainage channel for private driveways, courtyards, patios and gardens.

# TOP X

The drainage channel for private driveways, courtyards, patios and gardens.

## 1 Requirements

Drainage channels in private areas must

- continually withstand daily loads
- be easy to transport and simple to install
- be resistant to environmental effects (frost, heat and moisture)
- be visually pleasing

## 2 Application areas

- predominately private areas
- garage entrances
- courtyard areas
- terraces
- gardens
- parks

## 3 Solution

Because of this the new TOP X channels are very suitable for the drainage of private areas

- high stability and functionality
- low weight
- preformed supports for simple pipe connection
- gratings made of recycled composite, galvanised steel or stainless steel

TOP X access cover for slotted cover, galvanised	500	124	58	3,5	44390

# TOP X

## Quick and easy installation

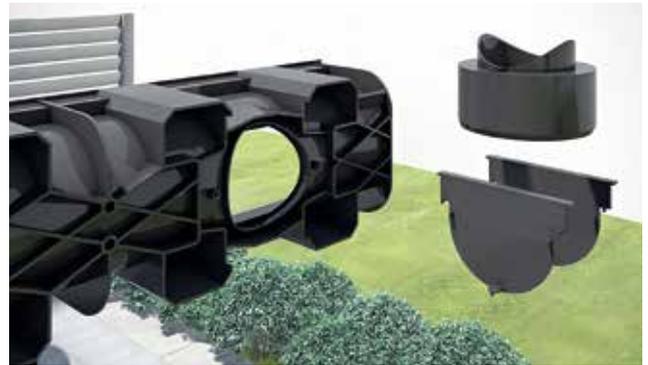

Produce trench in which to lay channel with frost resistant sub base.

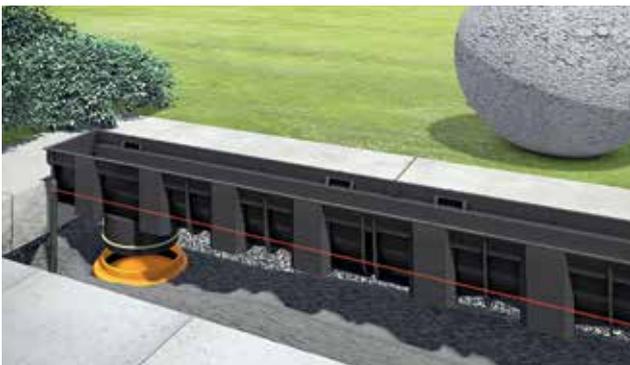

Fill with concrete and compress to foundation.

Produce connection openings.

Fit accessories.

Lay channels.

Haunch the concrete.

Install surface coating.

**TOP X** installation videos.

# Resistance list **RECYFIX®**

	Medium	Concentration	RECYFIX at 20° C
<b>A</b>	Acetic acid		+
	Acetone		+
	Ammonia solution	25 %	+
	Apple juice		+
<b>B</b>	Battery acid (H <sub>2</sub> SO <sub>4</sub> )	25 %	-
	Beer		+
	Brake fluid		+
<b>C</b>	Calcium hydroxide	s. a. l.	+
	Chloric acid		+
	Chlorinated water*	1,0 mg/l (free chlorine)	+
	Cold cleaning medium		+
<b>D</b>	Diesel fuel		+
<b>E</b>	Engine oil		+
	Ethanol		+
<b>F</b>	Fats		+
	Formic acid		+
	Fruit acids		+
	Fruit juices		+
<b>G</b>	Glucose		+
	Glue		+
	Glycol	25 %	+
<b>H</b>	Heating oil EL (Diesel)		+
	Hydraulics oil		+
	Hydrochloric acid	37 %	+
<b>I</b>	Isopropyl alcohol		+
<b>L</b>	Lemonade		+
	Lubricating grease		+
<b>M</b>	Machine oils		+
	Margarine		+
	Milk		+
	Mineral oil		+
	Molasses		+
<b>N</b>	Nutritive salts	aqueous solution	+
<b>P</b>	Petrol		+
	Petrol 95 - 98 octane		+

	Medium	Concentration	RECYFIX at 20° C
<b>S</b>	Sea water		+
	Sea water		+
	Sodium hydroxide	10 - 20 %	+
	Sugar		+
<b>U</b>	Urea		+
<b>V</b>	Vegetable fats		+
	Vegetable oils		+
<b>W</b>	Wine		+

+ = permanently resistant  
/ = temporarily resistant  
- = not resistant

g. w. L.= saturated aqueous solution  
max. 72 h each exposure, then cleaning

The information on the chemical resistance of HAURATON products is valid for non-displaced media and average expected outside temperatures in Central Europe. Temperature, concentration and exposure time are highly relevant for chemical resistance. Please note our (temperature) specifications in the table. In case of uncertainty, we recommend checking the suitability of the materials by means of samples within the scope of application. Further information is available on request from our technical department.

HAURATON drainage channels made of polypropylene (PP) described above are highly resistant to diluted acids and alkalis. They are also resistant to de-icing salt used in winter maintenance operations. If necessary, the suitability of the grating and angle housing material in contact with corrosive media should be checked. Gratings and angle housings made of stainless steel, made of CNS 1.4301 or CNS 1.4571, are generally resistant to corrosion.

All information on application technology which we pass on personally, in writing or as part of tests is given to the best of our knowledge. In reality, however, the complexity of the use or the complete transmission of information by the customer is not within our sphere of influence. Therefore, we cannot assume any liability. Of course, we assure you that the high quality of our products fully complies with our General Terms and Conditions.

\* Supplement to the resistance with respect to chemicals containing chlorine: HAURATON products are generally not suitable for use as flow-off channels in swimming pools. We do not produce (flanged) sealed channel systems that are suitable as flow-off channels or liquid-tight channels.
